

SaintlyMic: Thanks for coming.
Bach Zhaa: then options > citizen in the menu and change the password there
Zephyr Fox: Well it worked fine
SaintlyMic: awesome.
Cleat: Ill try that thanks
SaintlyMic: Please let me know how bad the lag is in the maze.
Zephyr Fox: I'm working on a huge animated underground build myself. It has maze monsters that zap you, and fem bots to nurse you back to health.
SaintlyMic: FEMbots, lol
SaintlyMic: I'd like to see your build.
Zephyr Fox: I'm still working on getting it to beta, but I could send you a like to the Yard for the recovery with the girls. Based this on the movie Maze runner.
SirGreendown: how do I keep a pick-up mover from detaching?
Zephyr Fox: sorry clicked away by accident.
Bach Zhaa: when you teleport?
SaintlyMic: Hey Zephyr Fox, is that your CAV your using?
SirGreendown: yeah, when it isn't supposed to detach on teleport
Zephyr Fox: Yea I did a little change of clothing tonight as everyone at the Iz was showing off.
Bach Zhaa: movers suck ...make sure both places are fully cached and keep trying. even merry has a 1 in 5 chance of getting to the LZ
SaintlyMic: I made my very first AW CAV tonight.
SaintlyMic: It is a Rick avatar replacement/upgrade.
Zephyr Fox: I'll be right back with coordinates. give me a sec. thanks.
SaintlyMic: ok
SirGreendown: well this time it worked
SirGreendown: I have Merry wings don't I
Bach Zhaa: Ill see her bouncing back and forth lol is why I mention it.. I know whats she's doing
Bach Zhaa: she get mad at you for that earlier?
Bach Zhaa: I came in at the tail end of that discussion

Bach Zhaa: really would be nice if you had her permission and all :\
OklahomaTraveler: My bach hurts tonight for some reason.. :|
Zephyr Fox: This is a build city called ZeFoxVille
SirGreendown: keep in mind, I don't cheat when looking for builds, if there is a build I really want to see I end up finding it the hard way
Bach Zhaa: but you dont need to exploit everything you see
Bach Zhaa: still not yours
Zephyr Fox: anyway, I'll take a look at the maze and take snap shots for the blog tomorrow.
Thanks.
Bach Zhaa: have your own area.. :) be content with that

SirGreendown: I still haven't found nickywest's city in AWTeen for her under the account NikkiCool

SirGreendown: she's been waiting for months for me to find it

Bach Zhaa: I have glider park right downtown that you aint found lol

Bach Zhaa: :P

SirGreendown: she lost it, no saved teleports of it anywhere

Zephyr Fox: I've got level one almost to beta so you can try that one. I also has a killer bunny based on the monte python sketch.

OklahomaTraveler: Done for.. catch ya'll later on. :)

Bach Zhaa: o/

Zephyr Fox: Cya later off to explore the maze now.

SirGreendown: Bach I found something by you

Bach Zhaa: o_o

SaintlyMic: Sorry about that delay. I was trying to send the link to my maze to myself, so I'll have it in the future to give to others, and so I will have an example I can use for other links.

Bach Zhaa: something I can be proud of?

SaintlyMic: Thank you Bach for making that link.

Bach Zhaa: oh sure.. its handy to have :)

SirGreendown: NAC Apple Butter Farms

Bach Zhaa: haha

Bach Zhaa: :D

Bach Zhaa: woot

Bach Zhaa: they b workin hard

Bach Zhaa: my townhouse is right there

Bach Zhaa: :)

SaintlyMic: The first part of the maze is tricky. lol

Zephyr Fox: nice bubbles

SirGreendown: nice Kuma Bear-style kitchen

Bach Zhaa: predates kuma >_>

Bach Zhaa: but thanks :)

SaintlyMic: I also have flashes of verticle lightening pools everywhere.

SirGreendown: oh you are right

SirGreendown: although I think LizLiz may have taught that to Kuma

Bach Zhaa: piano's kinda cool there too 4 different instruments

Zephyr Fox: I was attempting a visual effect kn the killer bunny but could not get the PE to turn to a different direction.

Bach Zhaa: with as much room as I had to work with.. its a miracle I got that much in

Bach Zhaa: quite a challenge

Bach Zhaa: across the street is where I taught AW to count lol

[REDACTED]

SaintlyMic: This is very complex.

Bach Zhaa: Im almost serious about that. when you used the animate command to count, it became obvious we were missing the number zero. I asked flagg to upload the zero so I could count to tenn

Bach Zhaa: woot

Zephyr Fox: Yup and very interesting story board.

SirGreendown: I agree Kmissile583K AWTeen does Rule, I am honoring your legacy by replacing your object yard with a brand new one, and I'm even building a new version of your hotel

SaintlyMic: I'm going to tear down my maze.

Bach Zhaa: O_o

SaintlyMic: just kidding. lol

Zephyr Fox: you should see the noiprocs. Very scary

SaintlyMic: I can hear them.

SaintlyMic: The Maze Runner - I've seen that a few times. Awesome movie.

SaintlyMic: I've got my sword.

SaintlyMic: I love the movie War Games. Imagine their expression if they saw technology today.

Bach Zhaa: yah pretty dated for this time

SaintlyMic: Back in the 1980's War Games was high tech. I remember.

Bach Zhaa: but some things are already approach star trek lol leaps and bounds now

Bach Zhaa: I want the holideck o_o

Bach Zhaa: o

SaintlyMic: Yeah. Now that would be the ultimate AW.

Zephyr Fox: Anyway this is a huge build here. I'm current working on the monorail to get this to beta so I can start to recruit some help.

SaintlyMic: Zephyr Fox. How did you keep the lag down?

Zephyr Fox: Keep the halls large and objects to a minimum

Zephyr Fox: It's all about the cell load really.

SaintlyMic: Ah. Now see, I'm doing completely the opposite. I'm going to finish my present maze as it is. Kind of like a stepping stone to the next stone. LOL I'm not going to tear down builds, or change finished builds as I learn. I'm finishing builds and star

SaintlyMic: starting new builds.

SaintlyMic: Each build will be better than the last.

Bach Zhaa: if you wonder what I think the future of VR should/could hopefully would be.. this vid is amazing. Holodeck building in real time

<https://www.youtube.com/watch?v=QP3YywgRx5A>

[REDACTED]

Bach Zhaa: I could build there :)

Zephyr Fox: I began this in June, but still not to Beta yet.

[REDACTED]

SaintlyMic: I am honored. But I'm nothing compared to you. My maze is like a little child compared to an old techy. Not that you are old. lol - I would love to help you. The only thing is I know nothing about how to make a build so it isn't laggy.

[REDACTED]

[REDACTED]

[REDACTED]

SaintlyMic: Hey. You ought to try my idea I started in my maze. I took avatars and put them in the wall at an angle like hunter wall trophies. Then I made a sign inviting visitors to have their own avatar, name, and gesture to put on the wall.

SaintlyMic: I'll advertize your maze for you if you want when your maze is finished.

SirGreendown: someone put a video of Jeremy Maclin scoring a Touchdown at 100n 100e

[REDACTED]

[REDACTED]

SaintlyMic: Oh, man. That is a better idea.

SaintlyMic: Like the old cartoon?

[REDACTED]

[REDACTED]

Zephyr Fox: Yea now you've got it.

Zephyr Fox: Too bad you can't make new avatars here.

SaintlyMic: Did you see my builds in the city of Fantasia?

Zephyr Fox: Maybe in the future we can get AWI to bend a little more.

SaintlyMic: I love these black marble walls.

Zephyr Fox: Still it is way better now than it was in 1995

SaintlyMic: I miss the exact type of "newness" I felt in AW back then. I still feel new everytime I learn new stuff in AW.

[REDACTED]

[REDACTED]

SirGreendown: In memorie of Owen Hart

SirGreendown: I found a sign saying that

SirGreendown: Owen Heart died in an accident at Kemper Arena in Kansas City

SaintlyMic: If I do that will I be prevented from playing again?

[REDACTED]

SaintlyMic: I done got all messed up now. LOL - I was chatting and forgot where I was.

[REDACTED]

[REDACTED]

SaintlyMic: I haven't been using my compass. I was trying to do it without using a compass, but that is nearly impossible, especially if a person doesn't already know the maze.

SaintlyMic: I will.
SaintlyMic: I promise.
SaintlyMic: In fact, I won't mention this to anyone.

[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]

Earendil37: yes and someone buiold for a memory for him
SirGreendown: I'm off to sleep
Zephyr Fox: So nice right?
SaintlyMic: I started something that looks similar to this in about 1999. I started a castle outer wall, but I never finished it. I couldn't get into Yellow for years.

[REDACTED]
[REDACTED]

Zephyr Fox: This is [REDACTED] the Noiprocs very scary
SaintlyMic: lol
SaintlyMic: AHHHHH.
Zephyr Fox: feel the rush?
Zephyr Fox: anyway the killer bunny is just as scary only funnier.

[REDACTED]

Zephyr Fox: use the shift key and go through the wall.

[REDACTED]
[REDACTED]

SaintlyMic: Those things in the dark are from the Halloween section in the object yard, aren't they?

SaintlyMic: I think I'm using them as chairs in my maze. lol

[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]

[REDACTED]

SaintlyMic: I've got to go for about an hour. I'm going to give my pet rats some attention.

[REDACTED]

Zephyr Fox: now there's a maze monster. LOL

[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]

SaintlyMic: My learning curve isn't like most people. Most people start out strong and then fizzle away after a while. Me, on the other hand, takes me a little longer, but not much longer, but when I get good at something I excel.

[REDACTED]

SaintlyMic: In fact, I'm going there now, so I can make a teleport, and then I got to take care of my rats.

[REDACTED]

Zephyr Fox: OK thanks very much for letting me drag you around.

Zephyr Fox: Cya Later.

SaintlyMic: Well, I told my friend here, but he doesn't get on the computer.

SaintlyMic: He doesn't care about computers.
