Good morning soccer families!

I'm Coach _____. I am very excited to have your player on our roster this season. Coach _____ and _____ will also be involved this season. We are excited to begin next week! Our team will meet on Mondays and Wednesdays 4-5pm at Crystal River Elementary School.

Players should come to sessions with cleats and shinguards and should always have water and a jacket (you never know with Colorado weather!). Players will not be allowed to wear jewelry or ball caps on the field - they are a safety liability.

Guidelines for the season:

- *We will use TeamSnap for team communication. Here are some [instructions for getting set up](#) once your invitation has been sent.*
- *Please use TeamSnap to indicate whether your player will be at practices and games once our schedule has been uploaded.*
- *We will get started right at 4pm, so please encourage your players to be ready to play (shoes on, water bottle stashed on the sideline, and on the field) at 4pm.*
- *Parents are welcome to stay and watch sessions, but I ask that you watch from a short distance.*
 - *It is important to me that players are engaged in the session and with their teammates (not their parents or siblings) during our hour together.*
 - *I will ask players to put their water bottles in a designated area and will encourage them to enjoy their water breaks as a team.*

My objectives for the season is for this group to have a bunch of fun and learn a few skills along the way. I hope to send them home tired after sessions and I hope that they want to keep coming back. If there is anything you think I should know about your player before we get started, please feel free to reach out.

I will be traveling April 29-May 5. Are there a couple of parents in this group who would be willing to cover the session/game during that time?

Looking forward to meeting you at our first session on April 17. Don't forget to send your players with appropriate clothing for the cold weather, their soccer ball, and plenty of water ;) Thanks!
