The 2026 Community Odyssey

Early in 2026, we held a survey to ask for questions from the community for an upcoming Community Odyssey. Thanks to their submissions, we got ourselves a 27 question behemoth of an odyssey for everyone to try. These are the results of that odyssey!

First off, let me start this by thanking my fellow QCers: TurtalKatThing and Snaquaza. They carried most of this event, and this would not have been possible without them.

Let's take a look at those finishers, shall we? In first place, we have **WarriorGallade**, finishing after 20 hours, 20 minutes and 36 seconds. I'm sure you did a great job finding resources for this. Any comments?
@**WarriorGallade:** took a while but now my search results are now nonsense
@**WarriorGallade:** and now i find fanfiction
Well.. congrats? I guess? You got our first place 75 points!

Second place was only 6 hours later and took home 70 points, as **bubidajeffery** finished the hunt in 1 day, 4 hours, 28 minutes and 29 seconds. Anything you want to say to the audience?
+**bubidajeffery:** goodly
+**bubidajeffery:** computerwizard smells

Less than 3 hours later, we had two finishers in short succession. at 1 day, 7 hours, 16 minutes and 30 seconds, and at 1 day, 7 hours, 21 minutes and 41 seconds, respectively, we have **Bert122** and **Oricorioiscool** finishing the CO. Any standout questions for you two?
@**Bert122:** me getting stuck was my fault every time. questions were good especially the first checkpoint q
@**Bert122:** actually q19 didnt need to be here
Oricorioiscool: oh
Oricorioiscool: that was it
Oricorioiscool: probably
Oricorioiscool: ggnicehunt q23 best q
Well done both, you too take away 70 points. Worth noting is that Oricorioiscool managed to finish the odyssey without asking for a single hint! Because the odyssey itself wasn't enough of a challenge.

Our fifth place finisher is quite the fiend: **menace02** completed the last question after 1 day, 14 hours and 13 seconds. Now I sense some foul play here.. Did you truly solve this by yourself?
+**menace02:** i hella just asked my brother for the answer cuz he grinds that game
I knew it! Well, you still get your points anyway. 50 in total!

Let's move on. Clocking in at 1 day, 15 hours 32 minutes and 59 seconds, **I❤PocketMonsters** took home 6th place, and.. Celebrated a bit prematurely?
I❤PocketMonsters: NICE HUNT!
I❤PocketMonsters: nvm that was wrong
I❤PocketMonsters: there goes my double down
***I❤PocketMonsters* has finished the hunt in 6th place! (01:15:32:59)**

Our 7th place finisher took quite a bit more time, but was no less impressive, taking home 30 points: At 6 days, 2 hours, 30 minutes and 28 seconds, **DrThop** completed their odyssey and could finally let go of their confusion.
@**DrThop:** I feel like I'm missing information here

The results get a bit muddy here, as there was a server reset between this finisher and the next. But at about 9 days, 18 hours, 40 minutes and 19 seconds, **Richard Papen** completed the odyssey and even with the 20 points they got, they had a bone to pick with a certain question.

Richard Papen: i mean i did solve the q yeah
Richard Papen: i was just stuck for a week and a half
Richard Papen: because if i could prove all of my 5 answers were correct, why would i start removing them one by one

Nonexistent_0 was the next to complete the hunt, after 15 days, 9 hours, 2 minutes and 54 seconds, and seemed to have been… eating the questions up?

+**Nonexistent_0:** q was indeed yummy

Silly non, you don't eat questions, You solve them! And get 20 points for it, of course. Which is what the last finisher also managed to do: **Zipzapadam** rounds out our solvers with a total time of about 16 days, 7 hours, 22 minutes and 27 seconds. How did you manage to clutch the hunt?

+**Zipzapadam:** its all thanks to the hard work of TurtalKatThing.

Oh? Another cheater perhaps? Nah, I'm sure we're fine.

While they did not manage to finish, RL and yeet dab xd did cross the checkpoint, and earned themselves a cool 10 points.

Congratulations once again to all finishers and we hope you all had fun!

You can find the questions, answers, and their submitters here. Thanks to Snaquaza for setting up the solutions!
