

StudentSquare @ ESM

ESM Schools has adopted ParentSquare (and StudentSquare for students) as our new “School to Home” Communications tool. Having one system for communication means that students can learn how to use one website/app to stay in communication with their teachers.

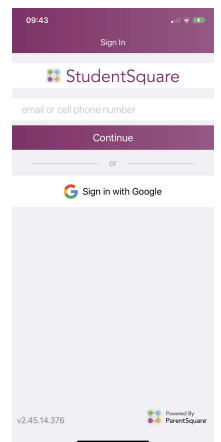

As you create your account, you will be able to set up your preferred way of communication. You can always update your preferences at any time.

There are two main ways you can review information and communicate with your teachers and Administrators: on a computer and on a smartphone. You only have to create an account once in StudentSquare, and then you can use either method.

Smart Phone/Tablet:

To use a smart device, you'll want to get the StudentSquare app first. Click the link below to get the correct app: [iPhone/iPad](#) or [Android](#)

Once you open the app, you'll click the “Sign in with Google” button and use your ESM Google account to sign in. The system will ask you for your cell phone number as well, so that you can receive text messages.

Computer:

Head over to [StudentSquare](#). On the right hand side, click “Sign in with Google” and use your ESM Google account information. You'll then get an email or text message that will help you continue through the process.

Hello. Welcome to StudentSquare.
