

Project ID: YW-2015-0018

Project Description: Elk River Project

Reason for Project: Steamboat L. storage supply and Elk R. WTP (3-5MGD). The costing tool was used to estimate the cost of a new WTP. A peak of 5 MGD, and an average of 4 MGD was assumed.

Project Status: Planned

Lead Proponent: City of Steamboat Springs

Lead Contact: N/A

Estimate Cost: \$61,308,000

Water District: 58

Project Key Words: Municipal & Industrial, Agricultural

Estimate Yield: 4 mgd

Water Right Needed: N/A

Latitude/Longitude: 40.545757 Latitude -106.908046 Longitude

Funding Sources:

Schedule: Completion in 2030

BIP Obj. Addressed: Goal 5 Obj 3. Identify projects and processes that can be used to meet M&I needs.
Goal 5 Obj 5. Support efforts of water providers to secure redundant supplies in the face of potential watershed impacts from wildfire.

Needs & Next Steps: Assuming annexation of Brown Ranch by the City of Steamboat Springs in 2024, the target date for having the Elk River Water Treatment Plan online is 2030. Next steps include property acquisition, water quality testing, and design.
