The Best Prevention Starts Early.

Research shows that effective prevention begins early. Children with actively involved parents can greatly benefit during their formative years. This time is critical and will influence their decision-making, understanding and setting healthy boundaries, and most importantly helping them reach their full potential. The Preschool Basic Parenting ® Training is an evidence-based training that focuses on parenting skills and ways to foster involvement in their children's academic experiences.

FREE Training Available

Rhode Island Regional Coalition is offering the Preschool Basic Parenting® training series for parents with children ages 3 to 6. Participants will learn how to strengthen their parenting through new strategies by discussing ways to build stronger relationships with their children and reduce conduct challenges. This training helps parents develop new methods to support their child's developmental stages and discover new strengths.

The Preschool Basic Parenting Training® encourages parent involvement that promotes:

- Parent-teacher-child relationships
- Developing new strategies to redirect challenging behaviors
- Children's social skills and language development
- Emotion knowledge and social-emotional development
- Increase parent and teacher social support and reduce stress
- Child's school readiness skills by nurturing academic skills

The Preschool Basic Parenting Training is a free and virtual training. Upon completion, participants will receive resource kits for their children.

This training is brought to you by the Incredible Years Program.
