SUBJECT: What the World is using Right Now VS what it actually needs

Hey,

Social distancing is the way forward now, and businesses across the globe have realised this very clearly.

In order to encourage social distancing, and promote safe experience for all...

They have **started using the QR Scanning Tech to show Menu Cards!**

But is it enough? Is it actually safe? Does it actually ensure complete social distancing?

What the world is using right now :

A PDF or a QR technology for showing just a menu which is essentially a PDF which no one can interact with...

And it still requires you to:

- **Stand in the queue** without being socially distanced
- **Come in touch with the waiters & people around** for placing the order
- Make payments through **highly contaminated card machines!**

Now you decide... It is really as safe & 100% Contactless as it claims to be?

Now, what the world really dearly needs :

A 100% contactless experience, right from going through the menu, placing an order to dining-in/take-away and making the payment that guarantees hygiene and safety where..

- **The visitor enters a shop/restaurant**
- **Scans the QR code** using the default camera or Google lens

- Able to see 100% digital menu, the price, discount, offers and more, which they can interact with themselves
- The visitor places the order, makes the payment from the phone itself
- The food/service is served to them

⚡ This is exactly what **ZeroTouch** lets you do!

[Go ahead and see it in action for yourself>>](#)

Thereby effectively allowing you to avoid the need to touch menu cards and minimizing interaction with the servers.

But this is not just it!

ZeroTouch allows you to start your own Agency... You can **Literally sell it as a service to local businesses and charge per Setup \$1000 - \$5000 one time fees or \$500-\$200/Monthly recurring income.**

[Go ahead and see it in action for yourself>>](#)

To your success,
[Your name]

PS: We strongly believe that our contactless ordering solution would **not only help businesses get back on their feet but also save lives** as the core idea of this innovative product is based on maintaining social distancing.

Body:

Hey [First Name],

The biggest problem this world is facing today is COVID-19.

And I have found something that will help you with capitalizing on the current market situation.

[LINK]

If you are following the news, you must be hearing about following the social distancing norms.

Businesses are being forced by the government to follow social distancing.

But it is not very easy for local store owners, restaurants and mom-and-pop shops to follow social distancing very effectively.

But we decided to find a solution...

...and we found a solution to this problem!

[LINK]

What if shopkeepers can have a scannable QR code? And their customers can just scan the code, place the order, and get the order delivered to them!

You see how easy it is?

But there is a catch...

Shopkeepers, or restaurant owners, or small businesses don't know how to set this all up!

And if they have to develop a system like this, they'll have to spend thousands of dollars, which they definitely cannot afford.

That is where you come into play!

Then you can set up the whole system for them, and charge them a retainer fee!

The good news is, this software is so user friendly that you don't have to be a tech nerd to set this up for your clients.

All you have to do is click a few buttons and follow the instructions!

And you can get started right away at a very small price (less than \$50)!

This is a limited time offer so don't wait till the last day.

Check this out, NOW: [LINK]

It will blow your mind!

To your success,
[YOUR NAME]

PS- Don't forget that this software's price will rise as its popularity grows. And its popularity will definitely grow because this solution is very new to the market and all the giants are already using it! This is the first time it is available for the common market, so don't wait till the market gets saturated:

Body:

Hey [First Name],

ZeroTouch has been launched in the market and people have started jumping in to buy!

ZeroTouch helps agency owners, marketers, and freelancers to bring this COVID-proof solution to the market.

The solution is to help the small businesses, shops, and restaurants to follow social distancing in a better and more effective manner.

ZeroTouch allows you to build a Scannable QR code for small businesses.

They can later ask their customers to scan the code and order the products without having a direct contact with the store owner, waiter, or store attendant...

Click here to see how it works:

[LINK]

And the good news is that you can easily whitelabel ZeroTouch and set it up for your clients, even if you are not very tech savvy!

Here is how it basically works:

STEP #1: Add your client's products and add-ons

STEP #2: Download the Scannable Code

STEP #3: Deliver it to your client

Now whenever someone will scan the barcode from their phone, all the products will display on their screen from where they can choose and pay for the order.

Your client will receive the order on his dashboard that he can directly deliver to his customer's place or waiting area!

You see? There is no cash exchange, no order taking, nothing.

Just scan, pay, and receive your order!

There is an immense opportunity here for you to make a lot of money.

You can even start selling this to the stores and shops in your neighborhood.

Believe me, they will happily buy this!

In fact, this product is what they have been waiting for.
