Sometimes when you are coding in groups, someone will make an error that will affect everyone.

Somebody has already written programs for the images below, but each one has a mistake! Figure out what the programs are supposed to look like, and circle the error in each one. Then, draw the correct symbol in the box beneath.

Each program should use the symbols to draw the image to its left.

- **Move One Square Forward**
- **Move One Square Backward**
- **Move One Square Up**
- **Move One Square Down**
- **Fill in Square With Color**
