

Visual Arts 8

Welcome to Art 8!

Who is my Teacher?

What is Art 8 about?

Art 8 is an introductory 6-week course that will give you a chance to try out and learn some important skills in Art.

What are we learning?

- How to design an image
- Develop images
- Background information about Art
- How to use different equipment, tools and materials in the Art room
- The processes used to create Art work

What are the projects?

Visual Arts 8 is evaluated on project work (like most Art courses). If you use your class time well, and try your best, there is nothing to fear! Over the next six weeks we will learn the basics of drawing, watercolor, painting, sculpture, and scratch art. It is also expected that you will complete a few sketches too.

How am I marked?

Your mark will be calculated according to the following percentages:

Technique/Skill building	40%
Creativity/Unique ideas	40%
Material care/Effort	20%

What am I expected to do?

- Come to class: On time, everyday.
- Bring paper, pens, pencils, pencil sharpeners, erasers, rulers, and anything else you would take to your other classes
- Have a separate section in your binder for this course
- Work on what we are learning in class
- Respect everyone in the classroom (students, teachers, school staff, guests), and their right to work and be in a positive environment
