

Bachelor of Arts—Fashion Industry's Science and Technology
University of Arizona College of Agriculture Life and Environmental Sciences
Pima Community College Transfer Pathway

The B.S. in Fashion Industry's Science and Technology is for students with an eye for design, an acumen for trend-spotting, and an interest in sustainable fashion. Whether you want to explore the creative or business side of fashion, you'll learn practical, desirable skills in pattern making, sewing, textiles and art. By studying modern material development and cutting-edge technology, you'll be a leader in sustainable fashion practices, applying them to a career in textile design, style direction or fashion journalism. Our program also offers you the opportunity to study abroad in Italy and France with iconic industry brands.

Pima Community College students looking to transfer into the U of A's Fashion Industry's Science and Technology program should use the following page as a recommended outline of courses. This information is provided by the [AZTransfer course equivalency guide](#) and is subject to change. Consult with your transfer admissions counselor and academic advisor to review specific courses and transfer pathways. After your official transcript is processed by the U of A, your coursework will be evaluated in preadmission for completion and grades (must receive C or higher).
