BACKTESTING DATA:

- WIN RATE: 53.66%
- LOSING RATE: 46.34%
- EV: 4.7
- AVG R PER TRADE: 9.776

*Most of the wins have a BIG return. AVG R Per Trade so high cause i got 4 trades with above 35R returns so it fucks up a bit the data.
And a lot of 10+ R's.*

RULES:

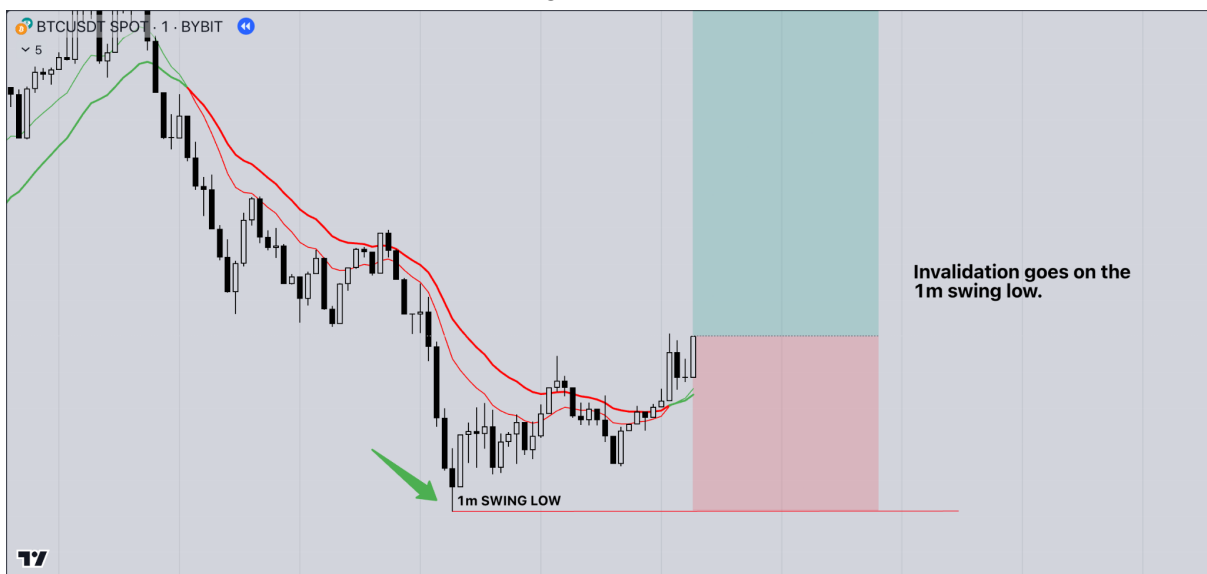

- **TRIGGER:** 15M uptrend with big impulsive candles. Price pulls back into or below the 15M 12/21 ema's

- **ENTRY RULES:** When the 1M 12/21 flip green, enter on the BOS/MSB.

- **INVALIDATION:** On the 1M swing low.

- **EXIT RULE:** Closer 1H Untested bearish Order block.

PERSONAL NOTES:

Live Trading notes:

Now with those market conditions we had in the last two months this does not work well.

Often price retraces before hitting the target.

Taking way more losses than the BT data.

Interesting to see the returns it will give me once the market is back to "green".
