

Embedding Videos in Canvas

Uploading a Video to YouTube for Educational Purposes

Step 1: Go to [YouTube.com](https://www.youtube.com). You may also find YouTube in the G-Suite App menu.

Step 2: Check to make sure you are logged in with your .cgc email address, by clicking on the **account menu**. If you need to sign in to your school email, remember it is yourmeid@cgc.edu - that will take you to the single sign on for Maricopa.

Step 3: Click on **Create a Video or Post** button. Choose **Upload a Video** from drop down.

Step 4: Name your channel.

Upload as...

First Name

Last Name

By clicking "Create channel", you agree to [YouTube's Terms of Service](#). [Learn more](#)

Changes you make here may show up across Google services with content you create and share, and to people you interact with. [Learn more](#)

[Use a business or other name](#)

CANCEL CREATE CHANNEL

Step 5: Find which video to upload and determine the correct privacy setting from the table. For videos pertaining to your course tailored to your students, choosing **Unlisted** is the preferred route so you are not sharing your video with the world. The world could still see the video if someone posted the link to the video, keep in mind. However, if you upload a video to Canvas students could right click on it and download your video to share either way.

Select files to upload

Or drag and drop video files

Public

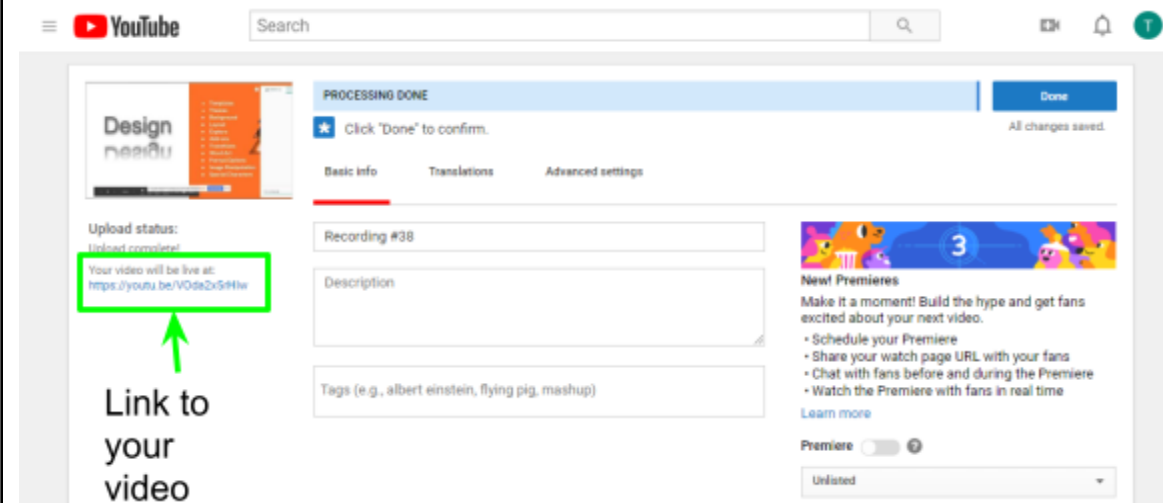

- Public
- Unlisted
- Private
- Scheduled

Feature	Unlisted	Private	Public
Can share URL	Yes	No	Yes
Can be added to a channel section	Yes	No	Yes
Shows up in search, related videos, and recommendations	No	No	Yes
Posted on your channel	No	No	Yes
Shows in Subscriber feed	No	No	Yes

For more on YouTube Privacy go here: [YouTube Privacy](#)

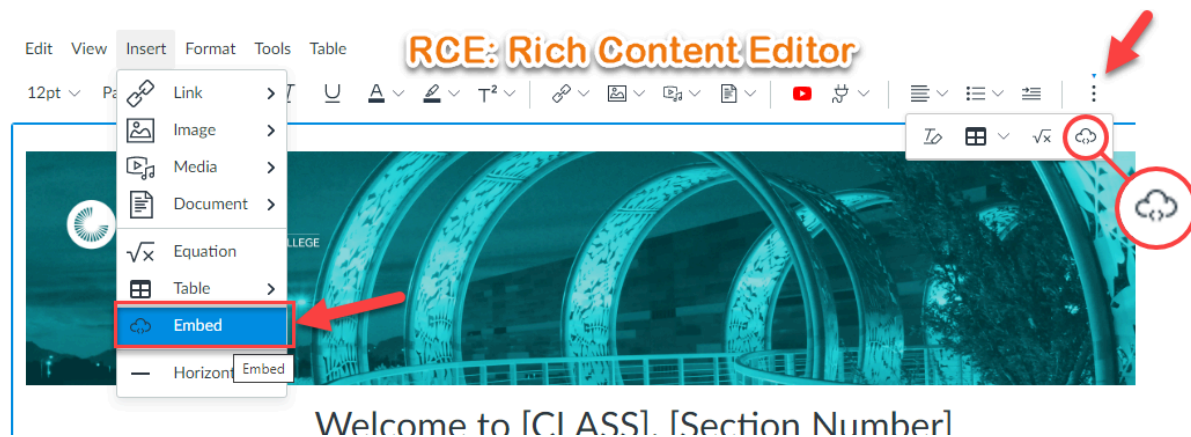

Step 6: Add a Title, Description, etc. Click Publish when completed.

Step 7: Once the processing is complete, the link on the left under Upload status will take you to your video on its YouTube page. Click on the **link to your video**.

Step 11: Paste the code in the **embed** tool anywhere in Canvas that has a rich text editor box like this on the right.

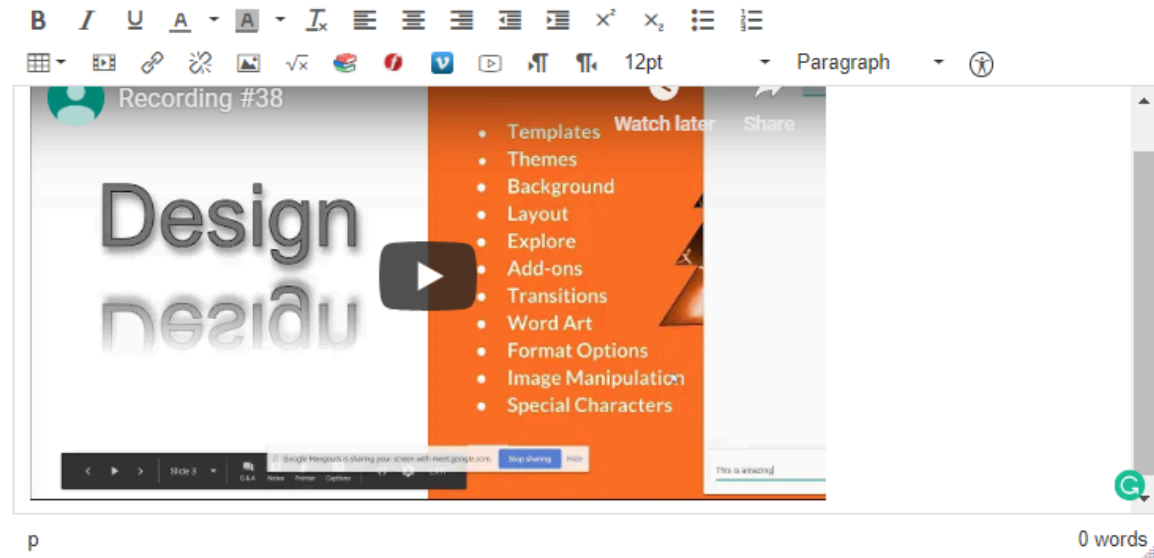

NOTE: You have to click **Embed** on center tab to paste the code.

When you are done, you will have the video there in Canvas but not taking up any of your course space

Do not forget to Publish!

[Schedule a consultation](#) to get ideas on how to use this to differentiate instruction!

Using Screencast-o-matic for Hosting & Embedding or Linking

This is my personal favorite, however, it is really important to always link to videos in addition to embedding them in Canvas courses.

Check out SOM's website:

[Upload to Screencast-O-Matic](#)

[Embed Video Code](#)

Other Video Hosting Sites

There are many other video hosting sites that could potentially allow for more secure recording. But remember the digital classroom is a classroom that can be shared. There is always a way.
