

VEX CODE VR

Activities

Fuel Frenzy!

Playground: VEX GO Competition - Mars Math Expedition, Stage 4

Challenges:

Level 1: Trigger one Fuel Cell cradle and deliver the Fuel Cell to the Rocket Ship.

Level 2: Trigger the other Fuel Cell cradle and deliver the Fuel Cell to the Landing Site.

Level 3: Trigger both Fuel Cell cradles, deliver the Fuel Cells to the Rocket Ship and Landing Site, and raise the Rocket Ship.

Helpful Hints:

- You may want to try using a [Wait] block to pause the robot's movement long enough to ensure the Fuel Cells or Rocket Ship are positioned as you intended.

wait 1 seconds

- Lift the arm of the Competition Advanced Hero Bot with the [Spin for] or [Spin to position] blocks.

spin ArmMotor forward for 90 degrees

spin ArmMotor to position 90 degrees

- Use the 'Score with Fuel Cells' Example Project to see one way to move a Fuel Cell and raise the Rocket Ship.
