

My Version of the Unofficial MHA Timeline (ft. ChronoKeeper)

Notes:

- Timeline & general dates are based on [this post by ChronoKeeper](#). They did most of the work when it came to ordering the canon events. I just built off of their timeline by adding some pre-canon stuff and calculating the dates I think would make sense.
- Exact dates are based on [this post, also by ChronoKeeper](#). More explanations for my choices [at the end](#).
- If you want to make your own version of this timeline, feel free to duplicate the document. This is the one I'm using, but I'm sharing this because I thought others might find it useful.

With that said, let's begin.

TIMELINE:

First Generation of Quirks (2021 - 2050)

- Thursday October 7, 2021 - All For One and Yoichi Shigaraki are born; the Dawn of Quirks begins
- ~2040 - The chaos of the Dawn of Quirks becomes widespread with the murder of the world-famous Luminescent Baby by AFO; in Japan, AFO uses this notoriety to begin building his shadow empire
- ~2045 - The man currently known as Kyudai Garaki is born

How I Calculated The Exact Years of Dates

- [This post by ChronoKeeper](#) proposes the following:
 1. Quirks could only have emerged in 1974 or later because the silhouette of the Wolverine, who debuted in 1974, appears as one of the comic book heroes referenced in chapter 1.
 2. Quirks have been around for at least 137 years, making the current year of MHA be **2111** (1974 + 137) or later.
 3. Due to Tiger being born on February 29, the current year must be **2112** or later. Based on analysis of dates in the manga and anime, the current year in canon actually must be **2116, 2144, 2172**, or dates in later centuries.
 4. The current year is most likely **2172**. The Quirk Emergence stagnated technology, which remains similar to modern tech in real life. If canon is currently in the year 2172, then Quirks must have emerged between 2011 and 2035, which includes the year (2014) that the manga was first serialized.
- I took into account that canon has heavily implied that the Shigaraki twins were likely the first Quirk users ever after their own mom, born even before the Luminescent Baby.
- As for the dates set before canon, particularly those pertaining to the Quirk generations and the history of OFA and its users, I calculated those based on [this post](#).
- For the exact days of the week and dates that the users of OFA were born, I noticed that Izuku was born on July 15 while Toshinori was born on June 10. That's 5 days before Izuku in the month before Izuku's birth month. I also found that, based on the years I think their birthdays would occur, Toshinori's birth would happen on the day of the week after Izuku's.
- This is how I calculated their birth dates:

1. First I estimated the general years they each could have been born in based on ChronoKeep's post. This involved a lot of guesswork around how old each user appeared to be at the times of their deaths.
 2. Then I followed this formula:
 - i. Each user was born during the month preceding the birth month of their immediate successor. So it would go like this: July → June → May → April → March → February → January → December → November.
 - ii. Each user was born on the day of the week following their successor. So it went like this: Wednesday → Thursday → Friday → Saturday → Sunday → Monday → Tuesday → Wednesday.
 - iii. Each user was born on the date 5 days before the date of their successor. So: 15 → 10 → 5 → 0 → -5 → -10 → -15 → -20 → -25.
 - iv. For the negative dates, I calculated what those days would fall on in the previous month. For e.g. April 0 = March 31 for En Tayutai.
 - v. Based on the days of the week each birthday is supposed to fall on, I was able to pick specific birth years for each One For All user.
- For the dates that each user received OFA, I estimated them like this:
1. Canonically, we know that:
 - i. Izuku held One For All for about **1 year**.
 - ii. Toshinori held it for **40 years**.
 - iii. Hikage Shinomori held the Quirk for **18 years**.
 - iv. Yoichi Shigaraki held OFA for **at least 2 months** after he escaped from his brother. He presumably held it for some time before his escape too.
 2. Nana Shimura likely received OFA after Kotaro's birth. Kotaro died at age 32 when Tenko was 5, 15 years before canon—meaning Kotaro was born ~7 years before Toshinori got OFA.

- a. Based on flashbacks in the manga, Nana probably got OFA from En in the field. Assuming she got it after Kotaro's birth, she probably took at least some time off for maternity leave. Let's say maybe a year, though this might be a lot to assume.
 - b. Let's say she jumped back into the field around Kotaro's first birthday, and got OFA soon after. That means she could have had OFA for up to 6 years. Possibly 7, but I took a year off to account for time on the field before she got OFA from En.
 - c. She probably held it for at least a year before Toshinori got it. So that gives her a range of **1 - 6 years** where she could have had One For All.
3. Putting those years together, One For All has existed for at least **60 - 65 years** if you ignore Yoichi. The other users presumably each held it for about 1 year or more, so that's another 4 years minimum.
4. I wanted to make OFA be ~90 years old since Izuku is the ninth user. This is my personal preference, so you can change it if you prefer. I assumed that Nana held the Quirk for **6 years**, and split up the time of the Quirk's existence as follows:
 - i. Yoichi held it for **12 years** before his escape (2081 - 2093)
 - ii. Kudo held One For All for about **1 year** (2093 - 2094)
 - iii. Bruce held it for about **2 years** (2094 - 2096)
 - iv. Hikage canonically had OFA for **18 years** (2096-2114)
 - v. Daigoro had OFA for about **6 years** (2114 - 2119)
 - vi. En Tayatai held One For All for **5 years** (2120 - 2124)
 - vii. Nana held the Quirk for **6 years** (2125 - 2130)
 - viii. Toshinori wielded One For All for **40 years** in canon (2131 - 2171)
 - ix. Izuku inherits One For All in February 2171
- That makes the Quirk 90 years old when Izuku inherits it. It also means that One For All was created when Yoichi Shigaraki was already 60 years old.

- This sounds absurd since Yoichi looks much younger than that, but that can be explained by a combo of his malnutrition & AFO using Quirks on him to slow down his aging and poor health.
- Based on the dates I estimated, that would mean Yoichi spent 42 years imprisoned by his twin brother inside a bank vault. AFO is an absolute turd.
