### ABSTRACT

*Usually less than 200 words*

Keywords: 5 keywords

### 1. Introduction

*One page only*

### 2. Literature Review

*Two – Three Pages*

### 3. Research Questions

*This research aims to achieve the following objectives:*

- (1) *What are the suitable learning theory principles should be integrated in designing MOOCs?*
- (2) *How to design and develop learning activities for principle X*
- (3) *How to design and develop.*

### 4. Method

#### 4.1. Design

*Use Design and Development based research design*

*Provide an appropriate diagram for the design*

*Provide an appropriate diagram for the research procedure*

#### 4.2. Samples

*State the number of samples involved in the need analysis phase.*

*Use Purposive sampling method*

#### 4.3. **Instruments**

*Discuss the instruments – interviews, observations or questionnaire to collect student background information.*

#### 4.4. **Development of the Product**

*Discuss the ID model plus process and the development process*

### 5. **Results**

#### 5.1. *Principle 1*

*Discuss with samples of screen captures how you apply principle 1 in A*

#### **Figure 1. XXXX**

#### 5.2. *Principle n*

*Discuss with samples of screen captures how you apply principle n in A*

### 6. **Discussion**

*Discuss your finding thoroughly and refer to certain tables, figures etc in Results.  
No need to mention on the value of mean etc.  
Support your finding (triangulation) with previous research findings*

### 7. **Conclusion**

*One – three paragraphs*

### 8. **Limitations and Future Studies**

*State the limitations of your study*

### **References**

*Use APA 7<sup>th</sup> Edition format*
