## Action Items from Previous meeting

1. Finisar to complete Beta version of OOM for the OCP summit demo.
  - a. <https://github.com/ocpnetworking-wip/oom> master branch
2. NOS shim developers to develop shims
3. Continue to plan the demo

## Agenda

1. Attendance: Those attending should add their names to the Google Doc attendance section.
2. Status of code development
  - a. OOM code
  - b. Implementation shims for NOS and switches
3. Planning the OCP Summit Demo.
  - a) who is doing what?
  - b) list of required hardware and source of hardware
  - c) finalize participants in summit demo.
4. Next Meeting planning, Wednesday February 10 at 11:00.

## Discussions

- Understanding that OOM is for optical modules, is there any plan for copper modules?
  - copper support is included
- Is there any plan for 25g support for oom, regardless optic or copper ?
  - focusing on sfp+ and qsfp+ with qsfp28 on the horizon (25, 50, 100G)

## Action Items

-
