Before starting…

Do you connect to eRepublik from your mobile?

For a complete eRepublik experience I recommend you to click on show desktop site, since the mobile version omits some interesting aspects of the game.

If you have any questions, please contact me:
https://www.erepublik.com/es/citizen/profile/4039570

or visit our new player help chat
https://discordapp.com/invite/JMdt7sw

Welcome to eRepublik!

You have just arrived at the game and it seems that you are giving it a try. The first thing you have to do is convert the newly created citizen into **your citizen**.

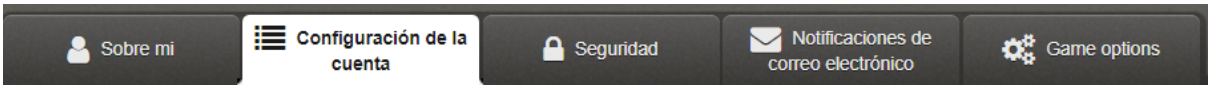

→ **Change your avatar and your name**. Access your profile by clicking on your nickname or avatar on the eRepublik homepage.

Once you are there, you simply have to click on the edit profile button.

And a new page will open with these tabs:

- On the tab **About me** you can change the visible text on your profile and your avatar.
- On **Account settings** you can change your nickname (the first change is free, the following ones cost 50).
- On **Security** You can change your password and select a security code that will be requested for certain changes in your citizen (buy companies, transfer money ...).

- On **Email notifications** you can decide if you want eRepublik to send you emails to notify you in certain cases (maximum recoverable energy reached, military daily order ...).
- On **game options** I recommend you to set this configuration:

If you have followed all the steps you have finished configuring your eRepublik citizen. Next I will summarize the basic details of the game.

Say hello to the community.

You can play eRepublik without using any chat or forum external to the game. Military units have in-game chat, citizens can open newspapers to express themselves, we can send private messages to other users and, most importantly, we have four tabs for immediate communication:

On the **tab with the flag of your country** you can't write if you are not the president of your political party, congress member or member of the government. You could only read and respond to comments.

On the **"Friends" tab** you can write messages that citizens who have accepted you as friends will see (or to whom you have sent a friend request and have accepted you). 

On your **Militar Unit tab** you can communicate with your comrades and read battle orders and other information that your commander deems appropriate.

On your **Political Party tab** you can communicate with your party partners and coordinate for elections or other actions.

Even with all the possibilities offered by the game, the citizens of the different countries have decided to coordinate and communicate through out-game means (external to the game). Here are the links to different servers hosted on Discord:

Basics about work and companies.

In eRepublik there are four ways to earn money: Working as an employee, working in your own companies, winning medals or buying Gold packages. Let's focus on the first two.

→ **Work as an employee.** By placing your mouse on the market tab you can enter the labor market. You will find multiple offers. I recommend you to select the one that offers the higher salary (keep in mind that you will receive the net salary, once the taxes are deducted). You should check the job offers every day, to see if you are interested in changing job to earn more CC (Country Currency) or not.

Important: **You can work more than once a day in companies.** To do this you must go to “my places” and enter companies. There you will see the citizen you are currently working for.

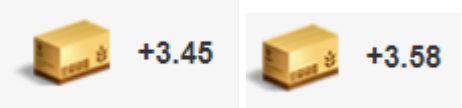

If you buy and activate a Q1 house you will earn extra hours points. Every 24 points (24 hours, 1 point per hour) you can do an extra job and earn twice the normal salary. **Some governments, military units or political parties give Q1 houses to new players, do not hesitate to ask!**

→ **Work as Manager - WaM**. When you sign up in eRepublik you get a few companies with which you can start to self-produce bread. Go to the tab of my places and companies. You have to create a **new holding** and assign to it your unassigned companies (you have to assign them one by one).

Important: Before assigning your companies, ask members of your country's government or colleagues in your military unit or political party which are the appropriate regions in your country for each type of company. For example, in eSpain the recommended region to produce food is Murcia, while the recommended region for weapons is La Rioja.

You can build your holding in any other region since the production difference is not drastic, but placing your companies in the recommended region of your country you will produce a little more and, therefore, you can earn more energy (or more money).

Region without food resources. / Region with food resources

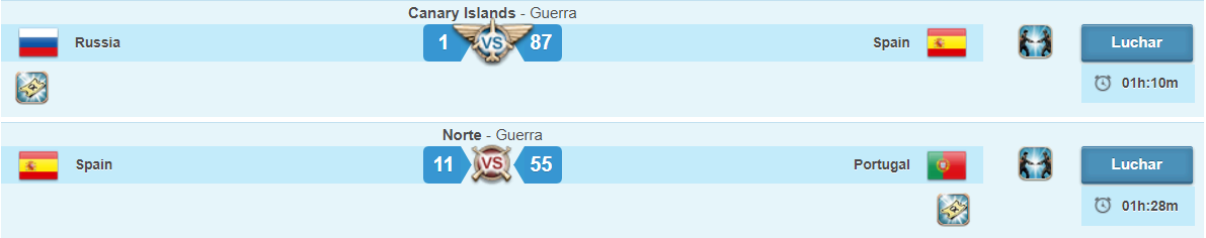

You should **place your residence region in the region where you have your holding**, in order to take advantage of the benefits of having a house Q1 (recover life faster) and be able to work without spending money to move between your residence and the region of your companies

Never buy companies
without asking an experienced player!

Before buying companies of houses, air weapons or raw materials of both bear in mind that you will not be able to work as manager, so they are not a good investment.

Basics about the military module.

In the game there are two types of battles: ground and air. Both types of battles alternate in all military campaigns.

Ground battles are divided into four divisions. Newcomers are born in **division 1**, so they will fight with all players who have not reached level 35. Between level 35 and 50 you will be part of **division 2**; between level 51 and 69 you will be **division 3** and, once you have more than level 70 you will be part of **division 4**.

With all the ground training camps at Q4 level (which means a large investment of Gold) you will gain 90 strength per day, spending 50 Golds in maintaining a training contract every month. **You will earn rank points when fighting in battles, increasing your maxhit** (damage caused by every 10 energy spent in battle). You can buy weapons to produce more damage, in this case the recommended weapons are Q7 (higher quality).

Since you will fight with many players who have been training their strength for years, **it is not recommended that you try to become strong in ground battles**. You should focus on air battles.

Air battles have no strength training. **You earn rank points for fighting in air battles,** and this rank is the only determining factor of air maxhit (damage caused by every 10 energy spent). Air rank goes up slowly, but it will take you less than a year to reach a good level if you focus 100% on fighting in air battles.

Fighting in air or land battles you will earn prestige points that will give you some prizes in the weekly challenge. You can earn bars, faster energy recharge, etc.

eRepublik achievements.

You can win Gold and CC with achievements. You can see the achievements you have won and the requirements to win new achievements in your citizen's profile.

The prizes for each achievement range from 1000 CC to 30 Golds.

Achievement	***Description***	***Reward***
	**Freedom fighter.** You kill a number of enemies in different RW. **True Patriot**. It is obtained by killing 25 enemies in battles of 50 different countries. **Mercenary**. You get it by reaching a certain damage by the country of your nationality.	1.000
	**Hard Worker.** You get it every 30 days of work, it does not need to be in the same company.. **Super Soldier.** You get it every 250 strength reached.	5
	**Congress member.** You are elected as a congressman on the 27th of each month. **President of the country.** You are elected as president on the 7th of each month. It is not obtained if you are elected president after an impeachment.	5 *it is not received in countries with dictatorship
	**Battle hero (BH)** It is obtained by the players who deals the most damage on both sides during a round of ground battle.	D1: 2 D2: 3 D3: 4 D4: 5
	**Héroe del aire** It is obtained by the players who deals the most damage on both sides during a round of air battle.	30

	**Resistance Hero (RH)** It is obtained by supporting the revolution of a region that is finally released. You can see a list of regions to release in this webpage. **(ask to an experienced player before supporting or you can lose the investment)**	5
	**Society Builder** It is obtained by inviting 10 new players who obtain level 10 or higher. Don't do multi-accounts!	5

Join the group.

To integrate into the community of your country I recommend you to join a Military Unit and a political party. Look at the rankings and observe the activity of the different organizations before deciding on one or the other. Remember that you can change your military unit or party at any time if you are not completely satisfied.

Military units:
https://www.erepublik.com/es/main/rankings-military/1/overall

Political parties:
https://www.erepublik.com/en/main/rankings-parties/1/overall

You can select your country by clicking 

Game rules and contact with the administration.

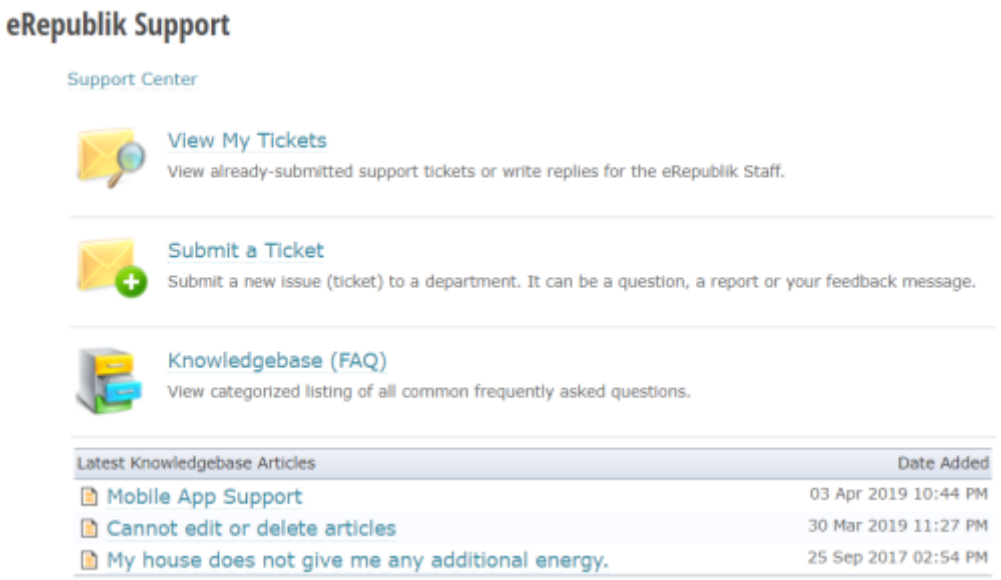

eRepublik has rules of behavior that all players must comply to avoid being banned.

eRepublik Laws

1. User generated content which contains vulgarities, pornography, insults, flaming, spam and/or external advertising is disallowed.
2. The use of a system exploit is disallowed.
3. Creating or administrating multiple citizen accounts is prohibited.

The penalties for breaching the basic rules of the game can range from an economic fine in Gold or CC (acquired through a bug or multi-account) to the temporary or permanent ban of the citizen. You can check more information here:http://wiki.erepublik.com/index.php/Rules

If you want to contact the eRepublik team because of a bug, report multi-accounts or inappropriate behaviors of other players, or request any information, you can access the “tickets” through this link:https://www.erepublik.com/en/main/tickets

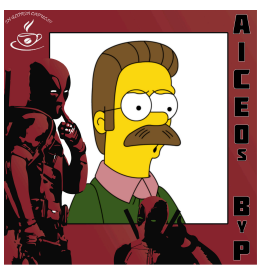

Click on “submit a ticket” and select the department with which you want to communicate. You must send the message in **English**.

Wiki and forum.

eRepublik has its own forum where users can talk to each other and receive information about game changes. Users can also access eRepublik own wiki in which you can read some of the eHistory of our game. You can participate in the wiki edition if you want.
