REFRIGERANT LEAKED OUT – CERTIFICATION

For refrigerators, freezers, window ACs & similar small appliances

Why this form? EPA rules require us to get a signed statement when an appliance arrives with no recoverable refrigerant because it already leaked out naturally (not because someone cut the lines or vented it on purpose).

Certification (read and sign)

I certify that all refrigerant in the appliance(s) listed above had already leaked out before I brought them to RZR Recycling. Recovery is not possible.

The leak was caused by system failure, accident, or other unavoidable occurrence — **not** by cutting the refrigerant lines or deliberately releasing the refrigerant.

(This is the language required by EPA regulation 40 C.F.R. § 82.155(b)(2)(iii).)

Optional – how did it leak? (helps us, not required)
