cat1_august

Subcat2_aug

Subcat1_cat1_august

Company- c1aug, email - c1aug@gmail.com,

Company admin - c1aug_admin1, c1aug_admin1@gmail.com

Manufacturer - c1m1aug, email - c1m1aug@gmail.com

Manufacturer admin - c1m1aug_admin1, c1m1aug_admin1@gmail.com;

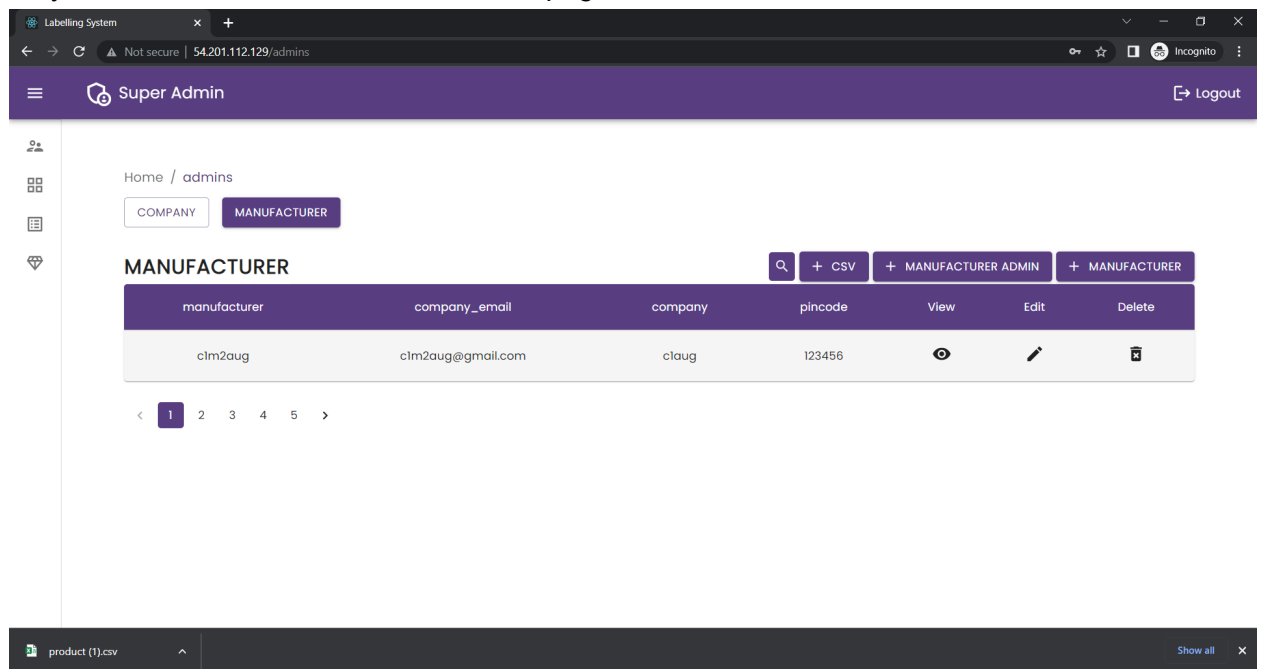

c1m1aug_admin2, c1m1aug_admin2@gmail.com

1. What happens if same email/user name is added?
2. Front end form validations - compulsory fields, valid email, phone number etc.?
3. In case of edit fields, non-editable fields should be locked & shown - TBD later
4. How to display long lists?

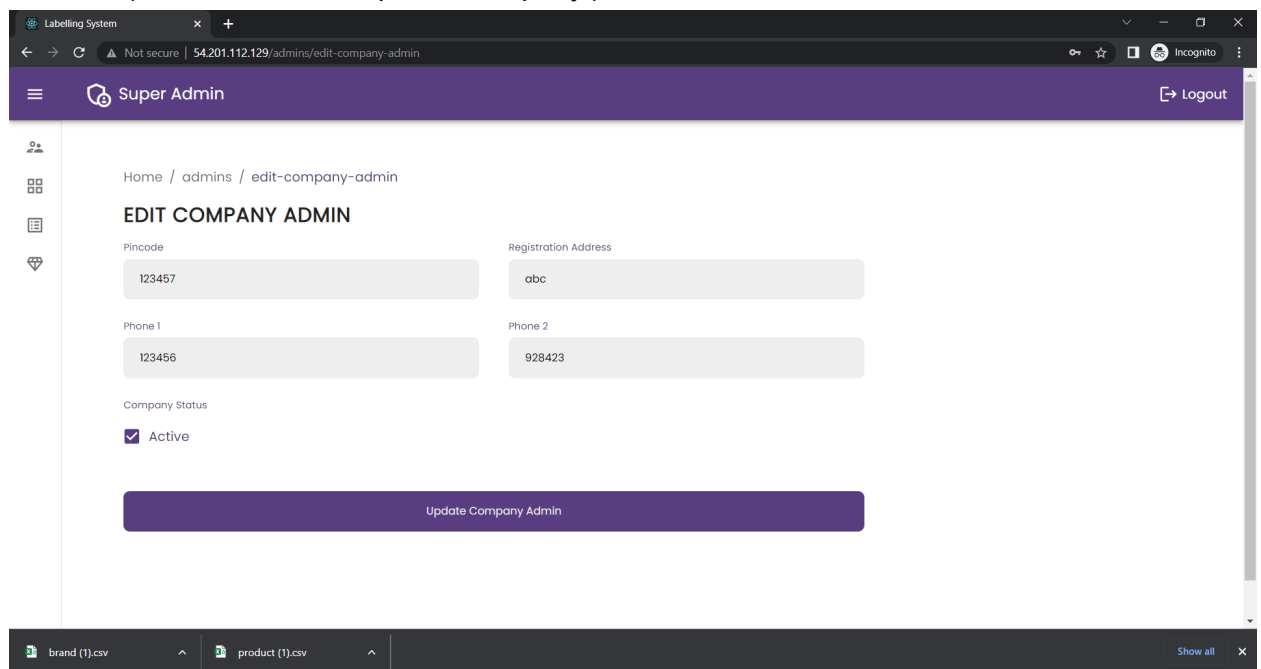

Super admin

1. Company creation - In case of failure in creation, it is not very clear as the message appears on top of the form which is out of the screen. Success/failure message must be shown on bottom of the page as well. Redirect needed?
2. Under edit company, there must be an option to add/remove subcategories allowed by the company
3. Under edit company, the heading & button says 'company admin', this should be changed to company.
4. Under create company admin, username field must be eliminated. Only email & password must be entered.
5. Under view company, company admin email must be displayed.
6. Under view manufacturer list,
 - a. Only 1 manufacturer is being displayed on one page. This should be a higher number
 - b. The search query should search from both fields 'manufacturer' & 'company'
7. Under create manufacturer, the create button has 'Create manufacturer admin' but it should be 'Create manufacturer'. Once a manufacturer is created, the page should redirect to 'Manufacturer list'.
8. Upon selecting edit manufacturer & filling the form, the 'Update manufacturer admin' button (Correct name is 'Update manufacturer') is giving an error 'Company_id is not defined'.
9. Upon creation of manufacturer admin, the form should redirect to the list of manufacturers.
10. Extract CSV of manufacturers
11. Brand creation
 - a. Warranty + Request help feature (& other check boxes) are not recorded while brand creation. The view brand option has blank values for selected checkboxes

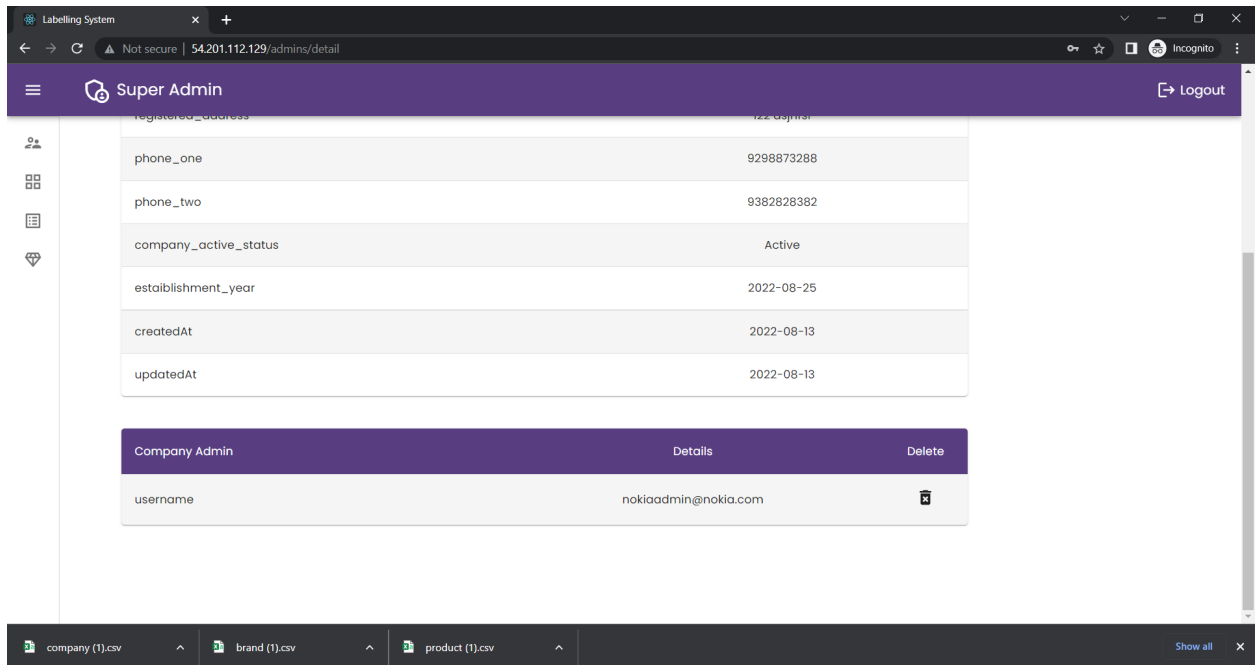

12. Only one manufacturer is shown on each page. Atleast 5 should be shown.

13. Company Edit page title is incorrect (Correct title is 'Edit company'). Button name is also incorrect (Correct name is 'Update Company')

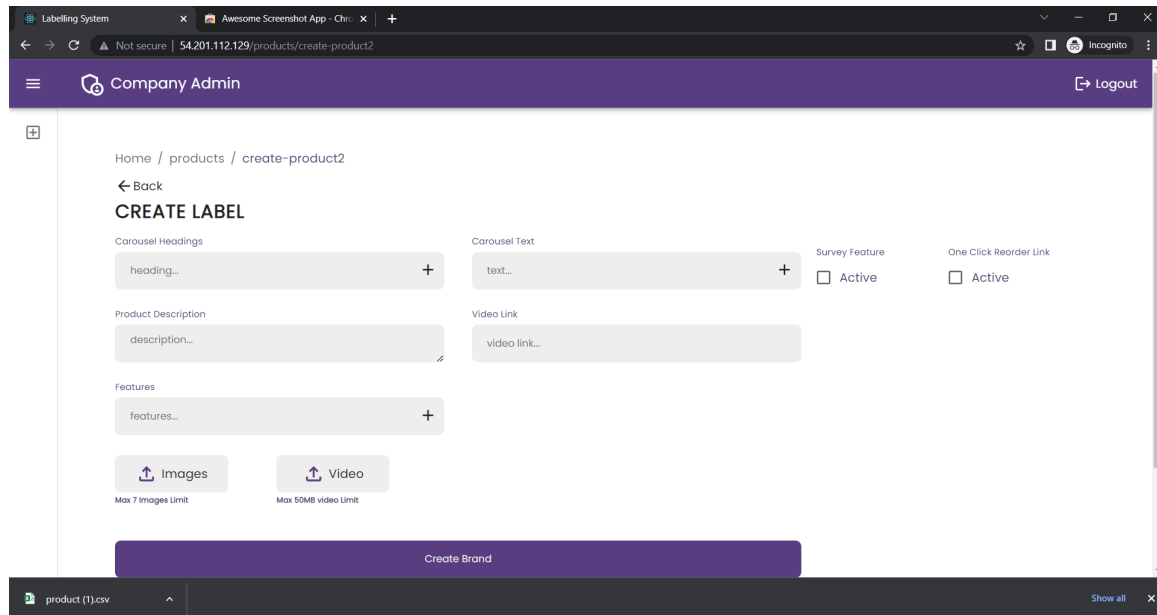

14. There should be an option to edit the company admin user from company details page - Confirm with Abhishek

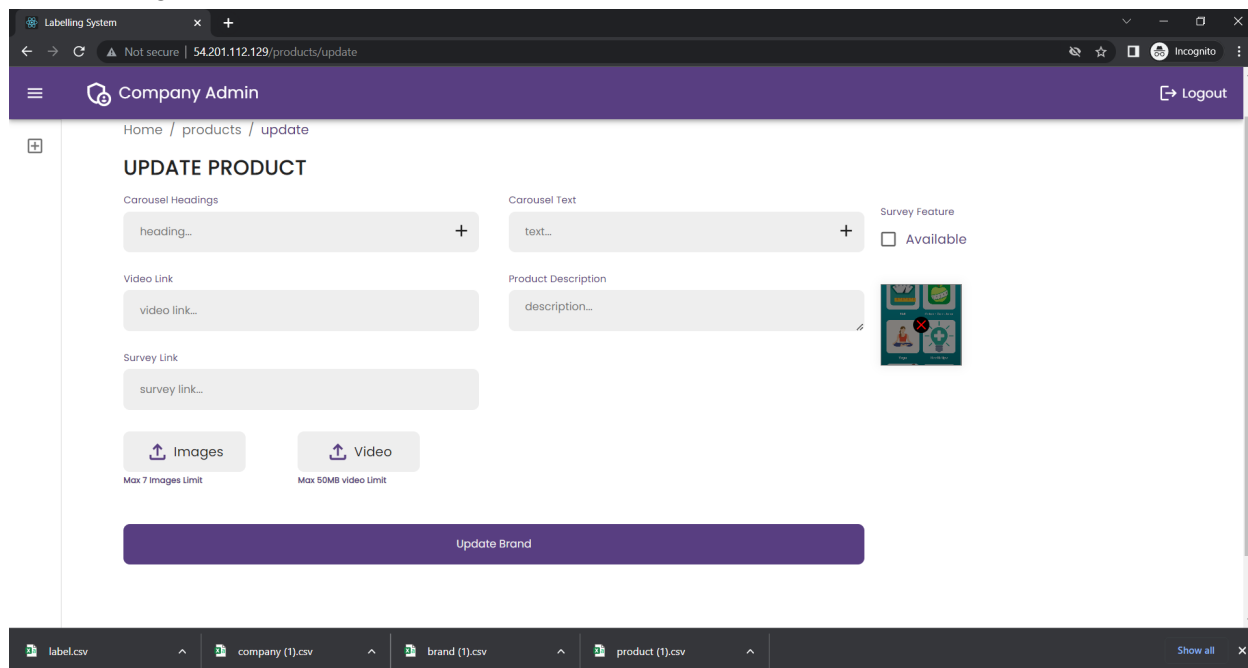

Company admin

1. Currently all products are displayed under the products list. However, only the products belonging to the company admin's company must be displayed here.
2. Create product:
 - a. Heading should be 'create product' & not 'create label'
 - b. Brands drop down should only be for the brands belonging to the company admin's company
 - c. Feature entry needs to be better. Deletion of one feature changes the order & will need re entry of all the features
 - d. Product was not created when multiple variants were entered
 - e. Title of breadcrumb is wrong in the product creation page. It should be create-product instead of create-product2

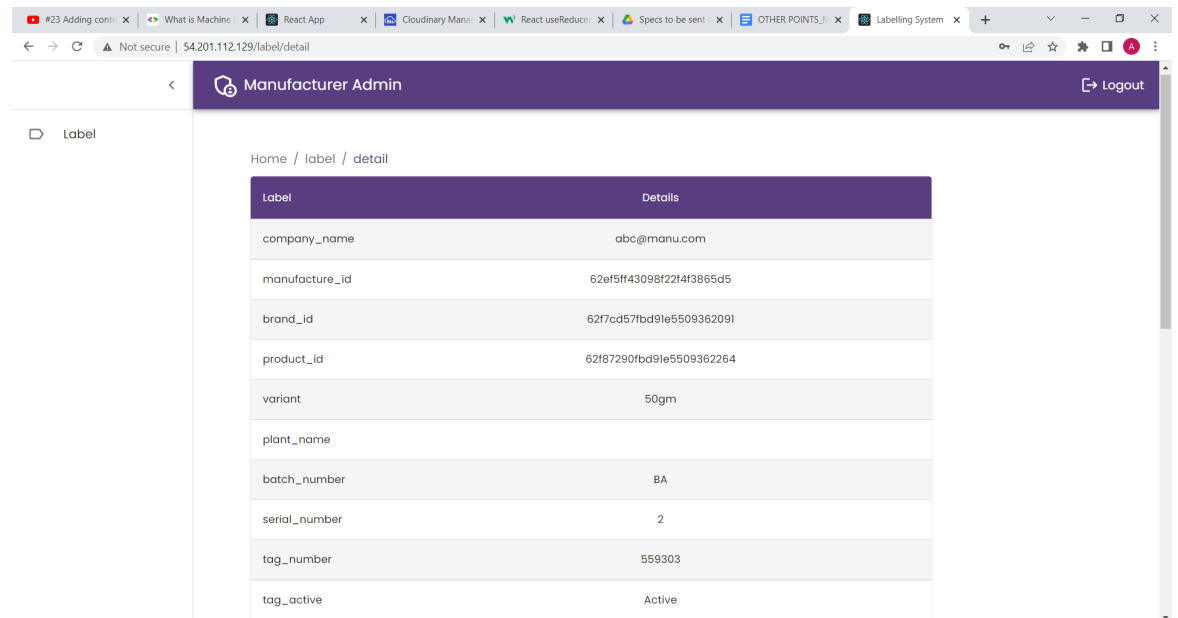

- f. In Edit Product, I removed one image and added another but when I refreshed, it had both.
3. Update Product page, button name is "Update Brand". It should be "Update Product"

Manufacturer admin

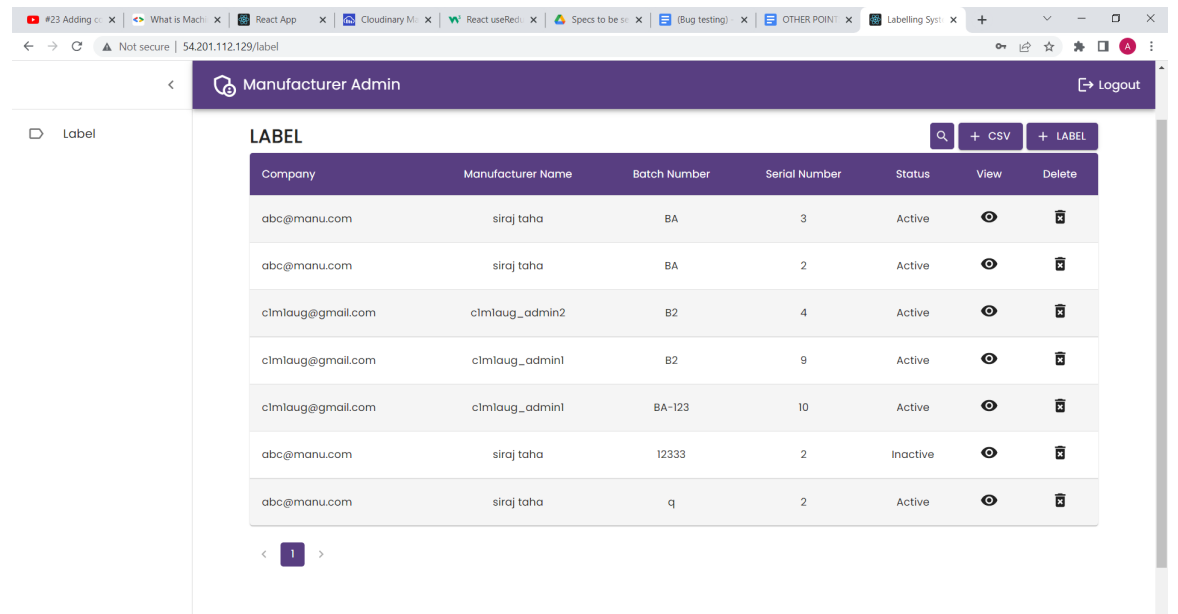

1. Under view label, only the labels generated by this manufacturer should be displayed.
2. DS1-URL & DS2-URL seem missing

- Label extraction needs to be better. There should be compulsory filters for 'Creation_date', 'Product name', 'Variant name' in this order. Non-compulsory filters of batch number should also be there.
- Under the create label, brands dropdown must have only the brands belonging to the manufacturer admin's company.
- Variant drop down must show only the values of variants for the product selected.
- Variant value is null in the 'View label' page. This needs to be corrected
- Label page shows company name as email id. It should be corrected
