## Introduction

Introduction consists of (in sequence) general background, state of the art as the basis for the scientific novelty statement of the article, scientific novelty statement, and research problem or hypothesis. In the end, introduction should mention the purpose of article review. Literature review is not allowed in the scientific article format, so it is replaced by the state of the art to prove the novelty of the article.

## Method

Method is implemented to solve problems, including analytical method. The method used to solve the research problems is described in this section.

## Result and Discussion

This section consists of research findings and discussion. Every finding should be supported by sufficient data. Then, research findings should be able to answer the research question or hypothesis stated earlier in the introduction.

All the tables, figures or data must be completed with the sources.

### Example of Table and Figure: 1. (12pt, bold)

Election Electability in 2019

Source: (Researcher, 2019)

## Conclusion

Conclusion states the answer of the hypothesis and/or research objective or scientific finding. Conclusion is not the repetition of result and discussion, but it is the summary of findings as expected in the objective or hypothesis. If necessary, conclusion can also be ended with the next idea to be implemented to the study.

## Acknowledgments

It must be your gratitude to anybody, institution or anything who help or contribute to author research, it can be one sentence or more.
