

Looking for Upwork Assistant

Hi guys!

I am now looking for a partner in America/Europe to help me create an Upwork account.

Please let me know how much you would like to get paid for it and I am open to discuss.

If you have any uncertainties or unacceptable points reading this doc, please let me know and we can discuss.

Sorry, Anyone who thinks this is a scam, you are not right fit and please stop reading right now.

I hope you make a nice decision for you and me.
Thank you.

If you are interested, please contact me here.

1. Who am I

I am a Japanese web developer who would like to work in Upwork, a US based job site.

Upwork is the largest freelancing site in the world, where developers work to make money.

<https://upwork.com>

2. Why do I want you

You know western clients (US or European) are cool and they pay at a higher rate for the same work, however, it's hard to win projects from them with my account

as western clients won't hire Asians because of the timezone, regional & cultural gap.

You might think "You create a US/European account, that's all and would be okay". It is not that simple. Upwork has very strict rules and policies on security and it blocks all VPN, VPS or proxy accounts and it's impossible to create American/European accounts. In other words, residential IP & actual resident is the only solution for me to work in Upwork.

I am in need of your help with accounts.

Upwork gives priorities and preferences to US accounts like "US only jobs" & higher hourly rates as it is a US based job site, so ideally a US account is preferable.

If you are interested in making money collaborating with me, please keep reading.

3. How do I work and make money in Upwork

I submit proposals in job postings, contact clients, discuss project specs, work on it, submit work and get paid from clients via Upwork.

What I focus on is mainly web development projects, which account for a large amount of upwork job share.

Factors of winning bids are related with reviews from clients, work history, worked hours, earnings so far and so on.

When we start, we have nothing and it is hard to win large projects.

As we complete projects, accumulate work history & reviews from clients, our profile(your profile precisely) gets easier to win bids.

Of course, there are some cases of getting awarded large projects from the beginning.

4. How much will you get paid?

I will pay you monthly via paypal either following way.

Fixed: 150 USD monthly

Percent: We will share profit from Upwork according to the discussed percent.

Earning will grow gradually and my & your share will also grow with this mode as the time goes by.

The longer we continue, greater payment for you this way.

5. What you have to do

It's simple and not complicated.

Create Account

Account needs to be created with your name, face and ID/Driver License.

I am not interested in your privacy, just making money with you.

I need to have access to an account email and I don't want to see your private email.

Please create an Upwork account & paypal account with a new email and share with us.

Again, for Upwork's strict rules and policies, email linked to the account needs to reflect your name.

Video Verification

<https://support.upwork.com/hc/en-us/articles/360010609234-ID-Verification-Badge>

Generally speaking, Upwork asks for the first video verification with ID or driver license in your hand after we finish the first project in Upwork and they will ask some technical questions and some stuff related to the completed project and briefly about yourself.

I will guide you how to answer those technical questions.

Upload Your Identity

Someday, Upwork will ask you to upload a driver license or ID card as an ordinary process to prove identity.

Again, I am not interested in your privacy.

Remote Connection

I can't connect Upwork directly as it blocks all IP mismatching accounts.
If you have an **extra** laptop/PC, install Teamviewer or Anydesk and please let me connect on it.
I don't want to access or see your private data on your laptop.
Teamviewer and Anydesk are widely used remote desktop connection softwares.

6. You need to be

M20+ in the United States. Older the better because you look like a senior.

7. This is not a scam

If you are skeptical of the above and not sure this is true, please take a look at the following URLs and you will get convinced.

There's nothing you should worry about. I don't ask for money nor personal information from you.

Please note it's a serious proposal and this kind of business is widely being done on the Internet & globally.
