

Overview:

Monitor time in status at a glance. Drill-in into the detailed time statistic to identify bottlenecks easily with Timentify Pro.

More details:

Timentify Pro allows you to monitor and analyze time spent in status for Jira issues.

Simple Jira issue view gives a quick insight into the time spent in statuses and on assignees during jira issue lifecycle.

Insightful detailed Timentify view allows to drill-in into data and identify bottlenecks. Various data representation capabilities and export into xlsx make powerful conjunction for meaningful monitoring and analysis.

Another plugin in Ledgerify products family that helps you save your time and improve your processes.

- Monitor: check how long your issues spent in each status by assignee at a glance
- Analyze: get detailed analysis of your task's lifecycle with extensive, informative and easy representation capabilities
- React: see bottlenecks right away and make smart decisions to improve your process
