

[A chronic pain for whitetails](#) June 7, 2024 Ohio

Farm and Dairy

... In December 2020, Ohio confirmed its first chronic wasting disease positive wild deer in Wyandot County ... Since that first positive, 49 wild deer in Ohio have been identified as having CWD, all in Allen, Hardin, Marion and Wyandot counties... During the 2023-24 season, 2,734 deer were tested and positive samples were found in Allen (1), Hardin (1), Marion (4) and Wyandot (21) counties..

[Chronic wasting disease has become a factor in reducing Ohio deer population](#)

September 8, 2024 Ohio, Columbus Dispatch on MSN

... confirmation of an infected Wyandot County deer in December 2020. To date, 50 whitetails with CWD have been verified in four counties ...
