Abstract—*Abstract written in English, maximum 250 words. One paragraph, contains the background, purpose, research methods used, results, and key (all lowercase, written in alphabetical much as 3-5 keywords).*

Keywords: *dddd, eeee, ffff, gggg, hhhh.*

Abstrak—*D*itulis dalam bahasa Indonesia, maksimum 250 kata.*Satu paragraf, memuat* ***latar belakang***, ***tujuan***, ***metode penelitian*** *yang digunakan,* ***hasil****, dan kunci (huruf kecil semua, dituliskan secara alfabetis sebanyak 3-5 kata kunci).*

Kata Kunci*: dddd, eeee, ffff, gggg, hhhh.*

INTRODUCTION

The manuscript is typed in 1 (one) space by using Ms. Word (Cambria font, size 10 pitch), with a minimum number of words ± 4000 words or 6-8 pages of A4 paper (including pictures, tables, illustrations, and bibliography), with typing limit, is left border = 3 cm, right border = 2.5 cm, upper limit = 2.5 cm, and lower limit = 2.5 cm

The introduction contains the **background of research problems (must be cited/quoted from previous journals / previous research), research context, methods used, literature review, novelty research, and research objectives. Use the MENDELEY Tools to perform citations.** All parts of the introduction are presented in an integrated manner in the form of paragraphs, with a length of 15-20% of the total length of the article.

References cited or cited use the APA 6th edition style, and please double-check with the bibliography (very helpful if you use the bibliography facilities in a word processor that is integrated with Mendeley)

MATERIALS AND METHODS

Materials & methods contain explanations in paragraph format regarding **the research design**, **data sources**, **data collection techniques**, **datasets,** and **data analysis** which are carried out by researchers, with a length of 10-15% of the total length of the article. **No Need to Present THEORY**. All types of formulas are written using Mathematical Equation (for MS Word users in the Insert => Equation section), including division/fraction, Zigma, Root, Matrix, Integral, Limit / Log, Power, etc. Don't Serve as a cropped image.

$$X = \sum_{i=1}^{n} f_i x_i \quad (1)$$

$$R = \frac{\sqrt{n+1}}{x_1 + n^2} \quad (2)$$

RESULTS AND DISCUSSION

The research results section **contains a description of the analysis results related to the research question. Every research result should be discussed. The discussion contains the meaning of results and comparisons with theories and/or similar research results.** Length of exposure to yield and discussion of 40-60% of article length

If you present a table, you must mention the table name and mention the source of table 1.

Vol. XX, No. X XXXX 2026 | DOI: 10.33480/pilar.vXXiX.xxxx

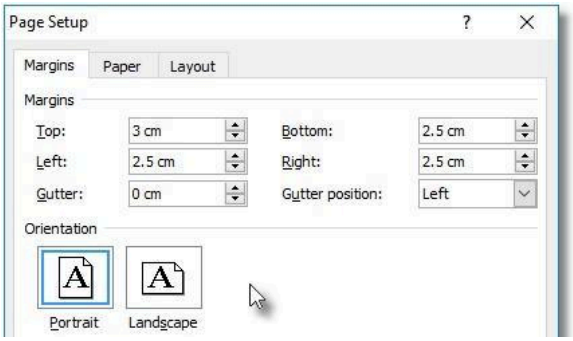

Table 1. The function of Power Supply Components

No	Component Name	Type	Function
1	Baterai	9 Volt	As a source of DC voltage
2	IC Regulator	7805	5 Volt DC voltage stabilizer
3	Capacitor	Elco	Storing temporary electric charge
4	LED	Diode	As an indicator
5	Resistor	300 ohm	Mains voltage resistor

Source : (Author's last name, year of publication)

Every source and/or citation in your manuscript you must use Mendeley and must be in your list of references

Each table/figure, you must mention in your manuscript. The table is displayed by removing the vertical lines. The naming of tables or figures is **NOT ALLOWED** to use chapter numbers, such as Table ~~II.1~~ or ~~Table 2.1~~, and the like. Likewise, images are not allowed, like this: ~~Figure 2.1.~~ Image Name, or ~~Figure II.2~~, and the like.
If you present a picture/table, you must mention the name of the image and mention the source of the image, as in the example of Figure 1.

Source : (Author's last name, year of publication)
Figure 1. The Page Setup window

If the image/table is the result of research conducted, then the source of the image/table written is the research result, the year the image/table was taken, for example:
Source: (Research Results, 2024)
Figure 1. Image title

References to images/tables from research results do not need to be included in the reference list, however, if images/tables are taken from other sources, those sources must be included in the Reference List.

CONCLUSION

The conclusions section contains research findings in the form of answers to research questions or the form of digest results of the discussion. Conclusions are not allowed to repeat discussing problems or theory definitions. Conclusions are presented in paragraph form. Not presented in bullet points or numbering

REFERENCE

The list of references contains only the sources referred to and all sources referred to must be listed in the list of references. Minimum 15 references, with primary references published within the last 5 years and secondary references within the last 10 years. **At least 80% of the reference sources are in the form of literature published in the last 5 years**. The references used are primary sources in the form of research articles in journals or research reports (including theses, theses, dissertations). Minimize book compilation. Articles published in the Journal of Educational Sciences are suggested to be used as a reference.

- No need to be grouped by book, journal, newspaper, or by other types of publication.
- **Using the APA edition 6** (American Psychological Association) style
- Systematics for reference from:
