

PROJECT IDEAS

BUILDING BLOCK PROJECTS

This QR Code will link to a YouTube Channel that has a series of step-by-step videos for Legos®/generic building block ideas.

HOW TO SCAN QR CODES

First of all, let's learn to scan a QR code. It's not difficult at all. Here is what you should do:

1. Download one of the apps from the list below.
2. Launch the app.
3. Focus the square frame on a QR code you want to scan.
4. Wait till the data of the code appears.
5. When you get it, follow the link, check the pic, download an app or perform any other action hidden in the QR code.

For Apple Users, this is an example of a QR Capture App or use any free QR Capture app.
