

Geo

nGe or GeGe

- Geo is made up of rounded, line pattern markings that look sort of like a contour map.
- It's always black or darker than the base.

General:

DENSITY:

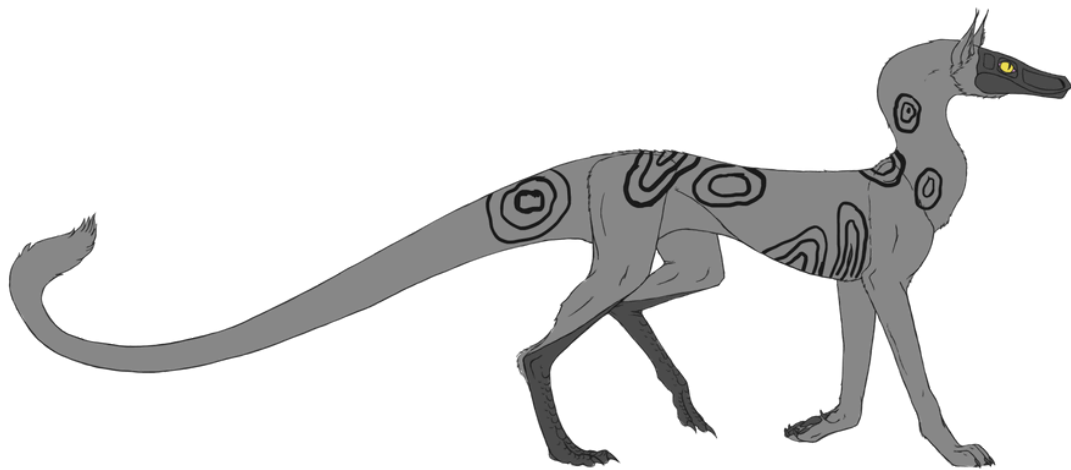

Sparse:

-small markings, the marks don't have to be closed, 3-10 over whole body

Low:

Larger markings appear, more frequent

Normal:

Dense:

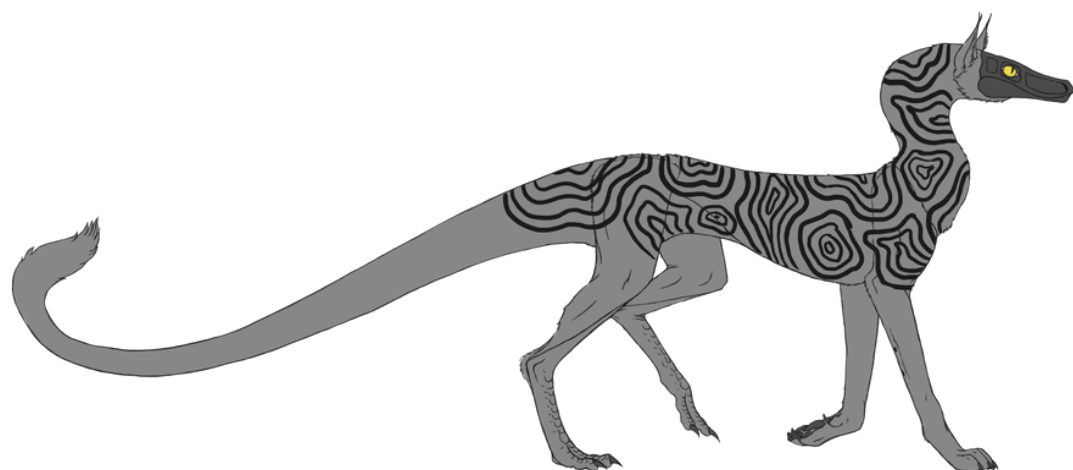

SPREAD:

Capped:

Topline:

Fullbody:

Tipped:

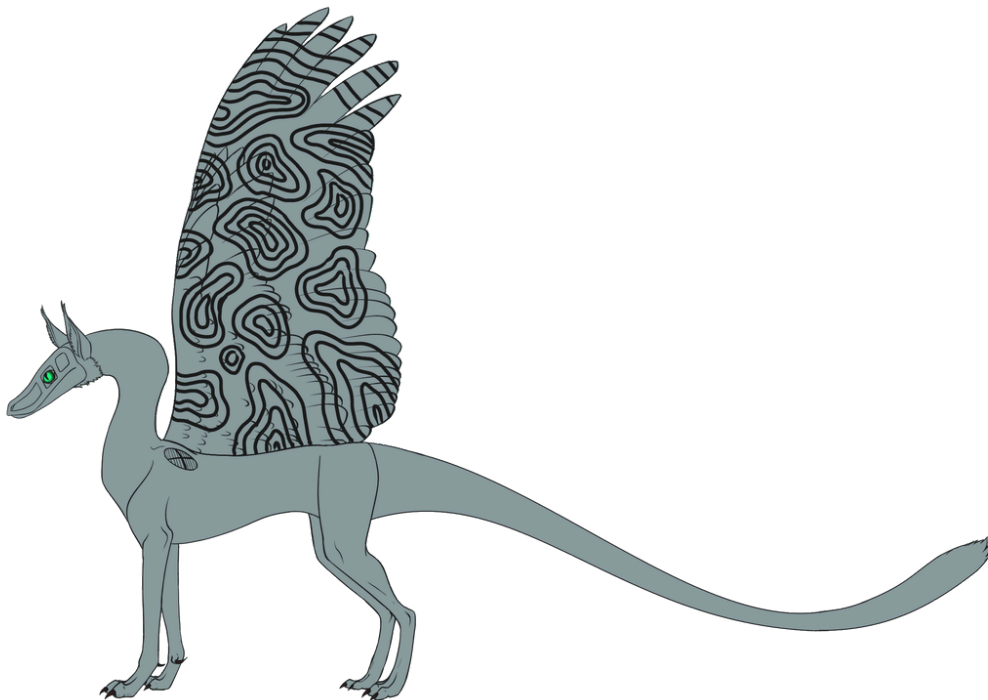

VARIANT EXPRESSION:

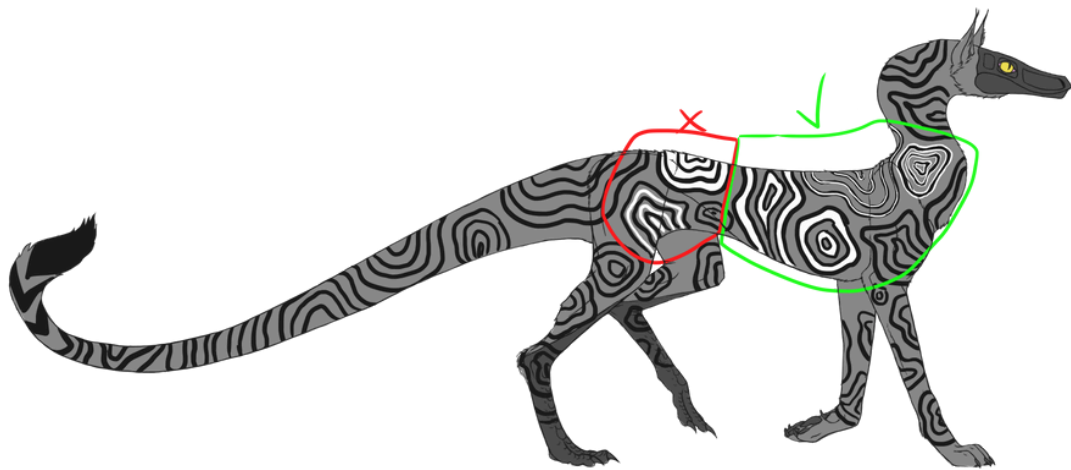

WITH WINGS:

- Geo does not have to show up on the wings at all. It does not have to follow spread or density rules, but if you want a more cohesive design, you can follow them.
- The example below shows the max amount of Geo allowed on the wings.

WITH SECONDARIES:

- ✓ fill the marking
- ✓ outline the whole marking
- ✓ Fill between the mark, skipping every other ring
- ✗ do not fill the whole marking
- ✗ do not add secondary rings between the primary rings

GROUP EXAMPLES:

Red Bleach with Gold Embossing and Geo

Blue Pearl Geo Rabicano [1/2]
