

SHIFT Project History At-A-Glance

Project Name Climate Resilient Landscaping	Project ID Number? XHF041	Chartfield
---	-------------------------------------	-------------------

Project Description / Scope:

The Climate Resilient Landscaping Project aims to demonstrate the integration of resilience science into landscape management and design for a university campus. We define climate resilient landscape as a design, installation and maintenance process that sustains biodiversity, enhances ecological functions, and honors the indigenous cultures of our bio-region, all while meeting campus aesthetic needs, Grounds department capacity, and despite the multiple stressors anticipated for our climate constrained future. Requested funds will be utilized to a) fund the work of a landscape architect, with expertise in native plant communities, to develop a landscape plan, b) prepare the site, and c) procure the plants, signage, and other related materials to complete the installation.
