

Glock 22

The Glock 22 is a popular semi-automatic pistol known for its .40 S&W caliber and reliability. It is designed for law enforcement and civilian use and features a standard 15-round magazine, a durable polymer frame, and a robust recoil spring.

The Glock 22 offers a balance of stopping power and manageable recoil. The pistol gains enhanced target acquisition capabilities when paired with Glock laser lights. These laser lights, easily attached to the pistol's accessory rail, project a visible beam onto the target, aiding accuracy in low-light conditions. This combination of Glock 22 and laser lights makes for a potent and user-friendly firearm solution.
