General Tips

- Holding down W skips through text much faster than any other means
 - You should be doing this 99% of the time (There is 1 time you need to release it, I've marked it in this guide)
- Holding down Z speeds up cutscenes (Fades, animations, etc)
 - When you start holding Z, keep all other buttons you were holding at the time down as well
 - For some reason, the game treats letting go of another button as letting go of Z
 - Pressing another game-bound key also cancels the Z effect
- At the moment we don't know the most efficient strategies for boss fights, so just don't die and try to deal a bit of damage every turn
 - If one of your party members dies and the boss has more than a sliver of health, F5 resetting is the best strategy
- Download the autosplitter and load remover! They are linked on the SRC page under Resources
 - They are easy to install and are literally free timesave, there's no reason you shouldn't do it
- Join the Arcadekitten speedrunning discord server
 - You can ask for help and tips from other runners here
 - We also have channels to talk about speedrunning her other games like It's Not Me, It's My Basement and Crowscare (and Tricks N Treats i guess 🙄)
 - Here's the invite link, we'd love to meet you:

 - It's also linked on the SRC page

- Fight the miniboss, using dual attacks whenever possible
- Move down after the cutscene until you see Mary

- For the cat toy, color the eyes 2nd from the bottom, then top
- For the puzzle box, the order is ROYGBV
- Exit the room and take the elevator to the 5th floor (4+1)
- Go to the closet and grab the key
- Take the stairs to floor 6 and go to room 605
- Read the diary
- After Mary joins your party, go to room 604
- Wipe up the blood in that makes the T shape in the middle of the room
 - Left, Middle, Bottom, Right is should be fastest
- Grab the key before exiting the room
- Take the elevator to the 5th floor (4+1) and enter room 507
- Interact with Gus, then the whiteboard
- Take the elevator to floor 1 (2-1) and go to the kitchen
- Interact with the 4 cabinets, then type MARSHMALLOW
 - Pressing shift takes you straight to the enter button
- Go back to 507 the same way you got there and interact with Gus
- Pick up the key after he leaves
- Take the elevator to floor 3 (2+1) and go to room 308 (You will have to go around)
- Grab the key, then interact with the door
- Interact with the swan on the furthest left above the chair, then the swan on the bottom-right, you should hear the door unlock
- Leave and pick up the key that blocks your way
- When Mary uses the bathroom, enter the room with the open door
- After Ollie leaves, you also should
- Interact with the bathroom door to trigger Rune coming down
- Take the stairs to the 2nd floor
- Save before doing anything else
- After you Save kill everything on the floor once, healing as needed
 - If you have an encounter that features Cervincision (the one that looks like a deer), flee the encounter and make up for it later by leaving and reentering the room and fighting however many extra times necessary
- Take the stairs to floor 1
- Enter the lounge, interact with the newspaper, and go back down
- Defeat Mallory
 - Fight all strats seem to be fast enough
 - Ruin strats are likely faster

- Hyper strats are probably the fastest, but also the most risky since Vasilis takes extra damage
- Return to floor 6 via the elevator (4+2 or 2+4 work equally well)
- Enter 604 and put the blocks in the 3 holes
- Take the elevator to floor 3 (2+1) and get the cat from 304
- Go back to 604 via elevator and interact with the blocks
- After the cutscene, leave the room and take the stairs to floor 7

- The first table is the one in the back where the people aren't sitting across from each other
- Interact with the waitress again, then the second table is the one with 3 people at it
- Interact with the waitress 1 last time, then the table below Drekaride and to the right
- Leave the room and go to 704 (Flower shop)
- Interact with Drekaride twice to get the rose
- Leave and go to 709 (Picnic), interacting with 701 on your way
- Put the rose in the pink vase then grab the pitcher
- Go back to 706 and interact with Drekaride again
- Go back to 704 and buy the bouquet
- Enter room 701 and read the note
- Take the elevator to floor 1 (2-1) and head towards the cafe
- Interact with the courtyard door on the way
- Enter the cafe/casino and talk to Hyllindrix
- Buy 3 Strawberry Milks before you leave
- SAVE before you enter the courtyard
- Interact with the bench to start the Bridezilla fight
 - Always fight with Vasilis unless they can Dual Attack
 - Ruin with Mary turn 1
 - You could either have Mary attack now or have her defend/MP restore to potentially get a 2nd Ruin
 - If you need healing, have Mary do it
 - Hyper strats are too risky for this fight as you are already very squishy
- After you defeat Bridezilla, go back to the casino
- Interact with Hyllindrix, then the chair behind him
- When Mary sits down, go play the game
 - You don't need to do anything during it, just hold W and Z
- Go back to the courtyard and give Minspella her ring back

- Go to the basement elevator
- Save here
- Grind enemies until you have \$700

- Buy as many Medkits as you can
- All of the following should be happening WHILE you grind enemies
 - Grab the Med Kit on the farthest left cabinet in the first hallway
 - Enter the first room on the left, interact with the electrical panel, grab the key
 - In the next room, enter the 2nd room in the right hallway, go up the middle, 2nd from left, and farthest right hallways and get their item
 - Enter the room in the left hallway of the 2nd room, interact with the middle of the left 2nd row, then chase the mouse
 - Come up on it from far away from the wall so it goes down towards your friends
 - Be sure to select to let it go (Top option)
 - Go back to the first room (this would be a good time to buy your syringe if you can)
 - Enter the room on the right and go all the way up to the chest
 - The combination is 4520
 - Back to the 2nd room, enter the 1st room on the right, interact with the furthest left cabinet for a Defibrillator if you feel like you need it then go to the shaking box on the wall
 - After Emerald's cutscene, go back to the electrical room and fix the wire box

- This is the solution for the electrical box puzzle

- After you have completed all of these goals, move up from the 2nd room
 - Turned the electrical box back on
 - Acquired new weapons for all 3 party members
 - Have at least 6 bandages
- Kill all the enemies you run into in the maze, but don't go out of your way for any
- Left, Up, 1 step Left, Up, Right, Up, Right, Up, Left, Up, Right, Up, Left to get through the maze

 - Vasilis should always be attacking or Dual Attacking

 - Ruin strats do not work since the boss heals after 1 turn

 - Use Hyperfection on Vasilis turn 1
 - Vasilis should Attack or Dual Attack always
 - Mary should use a Medkit on Vasilis if they are ever below 400 HP
 - If Tetra misses, Mary should use a Pure Electrolytes on herself so she has MP to refresh the Hyperfection

- If you are out of Electrolytes, Mary can either Attack or Defend/MP Restore
 - If Vasilis dies during the fight, F5 reset
- After defeating Dr. Tetra, hold W and Z through the cutscene
- Go to the stairs, then room 604
- Hold W and Z until time (first frame of "TRUE END" showing up)
