Looking For Ogden Water Damage Restoration Company? Swift Restoration and Remodeling Offers Water Damage, Sewage Cleanup, Mold Remediation and more Restoration Services In Ogden And Its Surrounding Areas.

Ogden Water Damage Restoration Company

Swift Restoration and Cleaning provides the following emergency water damage cleanup services in and around Weber County and Davis County, Utah:

- Emergency Water Damage Restoration
- Emergency Flood Damage Restoration
- Sewage Extraction & Cleanup
- Water Extraction & Water Removal
- Broken & Burst Pipe Cleanup, and more!

The trained, professional and courteous technicians at Swift Restoration are available 24 hours a day, 7 days a week. You need a *Swift* response to your water damage emergency and you can count on us! Immediate response, prompt action, years of experience and a highly proficient staff, makes our team more than qualified to help recover and restore your property and minimize your inconvenience.

Water Damage Restoration

Water can cause a significant amount of damage to your property in a very short period of time. A broken pipe, overflowing toilet, storms, and floods can all cause water damage to your property and belongings. Water damage must be addressed quickly to prevent additional problems and to avoid mold growth. Swift Restoration is prepared with the right equipment and the right training to perform successful water extraction and water removal from basement flooding, burst pipes, and even dangerous sewage backup.

At Swift Restoration, we often see first-hand how devastating water damage can be. Swift technicians are available 24 hours a day, 7 days a week. You need a *Swift* response to your water damage emergency and you can count on us!

Common Causes of Water Damage:

- Burst or leaking pipes
- Plumbing malfunctions
- Broken household appliances
- Natural disasters and severe weather
- Sewage backup

Follow these easy steps to begin drying your home:

- Start by opening doors and windows to let fresh air run through.
- Wear a mask to protect yourself against possible mold, mildew, and allergens.
- Disconnect the power, unplug any electronics, and remove electronics, furniture,

and movable items immediately.

- Remove as much water as possible. Use old towels, buckets, and mops to soak up as much water as possible.
- Dry out the area. Once you have removed all of the water, use fans and a dehumidifier to help dry out the area.
- Disinfect. After the area has dried out, including wood beams, insulation, drywall, etc., use a good disinfectant to get rid of any bacteria that might have come up through sewers, toilets, etc.
- Dispose of damaged items. You'll be tempted to throw everything into a dumpster and call it good. But if you can organize damaged goods into piles and recycle what you can, you will help alleviate the pressure on your local landfill site.

[Sewage Cleanup In Ogden UT](#)

Looking For Ogden Sewage Cleanup Company? Swift Restoration and Remodeling Offers Water Damage, Sewage Cleanup, Mold Remediation and more Restoration Services In Ogden And Its Surrounding Areas.

[Ogden Sewage Cleanup Company](#)

Sewage contamination in your home or business is a serious problem. Sewage contains numerous hazardous contaminants and microorganisms that can negatively affect your health and cause ongoing concern.

Swift Restoration has specially trained technicians to handle sewage cleanup and ensures your home or business is safe following exposure to sewage. Our goal is to return your home or business to its pre-damaged state quickly and safely. Our professional and friendly company is available in Weber County and Davis County in Utah.

Why Do I Need A Professional for Sewage Cleanup?

Sewage cleanup is not a fun job, and without the right equipment, those who attempt to perform sewage cleanup may be putting themselves at risk. Sewage cleanup is best left to a professional restoration company that has experienced technicians with specialized training for the handling and removal of sewage and items damaged by sewage. The certified and insured professionals that are qualified to clean up and restore your home or business from the dangers of sewer flooding should always be your immediate contact after a sewage disaster!

Hazards of Sewage Damage:

Bacteria – Bacteria is commonly found in sewage and can cause illness including

diarrhea, fever, nausea, and vomiting.

Parasites – Common parasites found in sewage including tapeworm, roundworm, giardia, and cryptosporidiosis. Symptoms of exposure may include fatigue, cough, dehydration, and can be life-threatening.

Viruses – Sewage can contain harmful viruses including HPV, Rotavirus, Norwalk Virus, and Adenovirus.

[Mold Removal In Ogden UT](#)

Looking For Ogden Mold Removal Company? Swift Restoration and Remodeling Offers Water Damage, Sewage Cleanup, Mold Remediation and more Restoration Services In Ogden And Its Surrounding Areas.

[Ogden Mold Removal Company](#)

Your property is especially susceptible to mold after water damage, as excessive moisture and humidity encourage mold growth. Your risk of developing mold increases exponentially after water has been present for 24-48 hours, so quickly addressing water damage is crucial if you want to prevent mold growth.

The affected area must be dried quickly and thoroughly to avoid a mold problem later on. The following steps can help you understand what to do after water damage, and how you can best reduce your risk of developing mold.

1. Call your insurance agent

First, call your insurance broker or agent and report the water damage. Plan to discuss your plan's coverage and specific information about the water damage incident.

2. Call Swift Restoration & Cleaning

Don't delay hiring a certified company to handle restoration and clean up after water damage. The sooner water damage cleanup can begin, the lower your risk is of developing mold. Swift Restoration & Cleaning is certified and trained in water damage restoration and mold remediation and will respond quickly to any emergency. If cleanup is delayed and mold begins to grow, cleanup costs will increase significantly, losses will increase, and it will take longer to restore your property.

When Swift Restoration & Cleaning responds to your property, we will take the following actions to begin drying and cleaning up from the water damage:

- If the source of the moisture has not been stopped, we will take immediate action to stop the water

- Items and materials that cannot be salvaged are removed from the area to promote faster drying
- Standing water is extracted and drying begins
- Once the area is thoroughly dried, we will restore the affected area to pre-loss condition

Mold Removal

If you already have mold or suspect mold growth, Swift Restoration & Cleaning can safely remove the mold and prevent it from spreading to other areas of your property. Mold growth is not uncommon in areas with excessive moisture, areas that have suffered water damage, or when you may have water damage that is not immediately apparent, such as from a slow leaking pipe.

Mold requires careful removal to prevent disturbing the mold spores and to reduce mold exposure to you and your family. Here are some things we do:

- Seal off the affected area from the rest of the home.
- Our workers wear protective gear to protect their health and to prevent tracking mold spores from the contaminated area.
- We only use fragrance-free detergent to effectively clean and remove the mold with the least amount of irritation.
- An exhaust fan will be set up to draw any airborne mold spores to the outdoors, not into your home.

Mold Inspections

Mold is not always visible, and it is possible you may have a mold problem without actually being able to see it. If you suspect mold growth or if you've experienced water damage recently that was not dried in 24-48 hours, Swift Restoration & Cleaning can provide a mold inspection to locate areas of mold growth. It is possible for mold to be growing behind wallpaper, in wall cavities, on basement subfloors, in crawl spaces, and under wall-to-wall carpeting.

The best way to prevent mold growth is to address water damage as soon as possible. If your home or business has water damage or if you suspect mold growth, call us today.

[Carpet Cleaning In Ogden UT](#)

Looking For Ogden Carpet Cleaning Company? Swift Restoration and Remodeling Offers Water Damage, Sewage Cleanup, Mold Remediation and more Restoration Services In Ogden And Its Surrounding Areas.

[Ogden Carpet Cleaning Company](#)

If you're planning on hiring a carpet cleaner in the near future, it's important that you do your research before you hire any carpet cleaning company. This will save you many headaches in the long run.

There are many unscrupulous carpet cleaners out there that will take advantage of unsuspecting homeowners. There are also many companies that offer extremely poor workmanship. If you've ever hired one of these companies in the past, you can relate to what I'm talking about.

How is Swift Restoration and Cleaning Different?

We offer a [Free Carpet Audit](#). If you live in my service area, this is something that you'll definitely want to take advantage of. I'll meet with you personally to offer you this valuable service, and show you how to get the longest life from your carpeting investment. I'll also show you why maintaining your carpet is such a crucial part of maintaining a safe living environment.

During the [FREE in-home CARPET INSPECTION](#), Swift Restoration and Cleaning takes a close look at your carpet and we tell you exactly what will help them look their best, and what we can do to remove anything from them that could be causing an unhealthy environment in your home.

When Swift Restoration & Cleaning Cleans your Carpets & Rugs you can expect:

Long Lasting Deep Clean – We extract all the dirt, grime & debris of 100% of your carpet yarns. We don't just buff the surface like some bonnet or carbonation methods (Dry-Chemical Systems) do. With our cleaning process your carpets and rugs will stay cleaner longer because we extract all the dirt & debris.

Kills Germs, Bacteria, and Dust Mites – Our High Powered, Truck-Mounted Steam Extraction process kills and extracts most germs, bacteria, and dust mites from your carpet fibers. 98% of the carpet mills recommends Hot Water Extraction (steam) as the preferred cleaning method.

We Use Safe-Bio-Degradable Cleaning Agents – The cleaning agents we use are designed for your particular carpet & rug fibers and are safe for children and animals.

No Cleaning Residue Left in Your Carpets – We use rinsing strokes to make sure no cleaning residue is left in your carpet yarns. By flushing out all the dirt, grime, and cleaning agents we restore your matted traffic lanes to fluffy and soft carpet fibers with no soap residue making your carpets stay cleaner longer.

Fast Drying Time – Because of our deep extraction, van-powered truck mounted equipment, we pick up 98% of the moisture we put down. Only your carpet fibers are barely damp. Depending on the grade of carpeting and the air circulation in your home our drying time is approx. 2-10 hours.

We don't Cut Corners, We Clean Them – We take all the time needed to clean every square inch thoroughly.

We Move Most Furniture – We move most furniture and place plastic tabs and blocks under the furniture so the carpets will dry properly.

We are IICRC Certified and a Chosen Member of Ethical Services – This assures you that we have been trained and tested. And we abide by a strict code of ethics which results in the highest level of customer satisfaction.

100% Satisfaction Guaranteed or our service is free – There is nothing worse than paying for a service and not being happy or thrilled with the results. You have peace of mind always when you use us to clean your carpets.

Years of Experience – As the saying goes “practice makes perfect.” And we have perfected our cleaning methods and spotting techniques to give our clients maximum cleaning results. If it can be gotten out, Sunrise gets it out.

Professional Friendly Service – You will receive friendly, informative, and caring service from your first phone call to the completion of your job. We also call a day or two later to make sure you are still thrilled with our service.

Children and Pet-Friendly – Swift offers children and pet friendly **carpet cleaning Ogden** solutions that keep everyone healthy and also provides the fluffy-oh-so-soft-on-my-feet experience.

Give us a call. We're locally based in Ogden, UT and take pride in offering genuine customer service. Our technicians are polite, friendly and are thoroughly trained professionals. In fact, we guarantee your complete satisfaction!

[Fire Damage Restoration In Ogden UT](#)

Looking For Ogden Fire Damage Restoration Company? Swift Restoration and Remodeling Offers Water Damage, Sewage Cleanup, Mold Remediation and more Restoration Services In Ogden And Its Surrounding Areas.

Ogden Fire Damage Restoration Company

Fires may start small, but under the right conditions, a fire can spread out of control in a matter of minutes and become catastrophic and tragic.

If you discover a fire, evaluate the situation quickly. With a small controlled fire, you may be able to put it out with your extinguisher, but NEVER underestimate the danger from fire. If you're not sure you can manage it, let the Fire Department do the work.

Swift Restoration are Experts at:

- Fire Damage Restoration
- Smoke Damage Cleaning & Restoration
- Soot Damage Cleaning & Restoration

Identifying Types of Smoke

A fire loss is devastating and complex because of the unique behavior of smoke. It is important to have trained technicians at the loss location. Swift Restoration & Cleaning knows how to handle damage in Ogden, UT from smoke, soot, and the other results of fire.

- Hot smoke migrates to cooler areas and upper levels of a structure.
- Smoke flows through plumbing systems, using holes around pipes to go from floor to floor.
- Depending on the type of smoke, it will greatly affect the restoration process.

Swift Restoration & Cleaning steps in, takes charge, addresses your concerns, and tests the smoke to see which of the following types of fire occurred.

- **Wet Smoke** – Low heat, smoldering, pungent odor, sticky, smeary. Smoke webs are more difficult to clean.
- **Dry Smoke** – Fast burning at high temperatures.
- **Protein** – Virtually invisible, discolors paints and varnishes. Extreme pungent odor.
- **Fuel Oil Soot** – Furnace puff backs cause fuel oil soot.
- **Other Types** – Tear gas, fingerprint powder, and fire extinguisher residue are other types.

Pre-testing Your Property

After **Swift Restoration & Cleaning** knows the type of smoke, the next step in evaluating the damage to the property is pretesting to determine:

- What can be restored and what must be replaced
- The most effective cleaning method
- Condition of the property before the damage occurred
- The full extent of the loss

[Tile Cleaning Services In Ogden UT](#)

Looking For Ogden Tile Cleaning Company? Swift Restoration and Remodeling Offers Water Damage, Sewage Cleanup, Mold Remediation and more Restoration Services In Ogden And Its Surrounding Areas.

[Ogden Tile Cleaning Company](#)

Why hurt your knees, dry out your skin, and fight with harsh smelly chemicals when you can get sparkling clean tile and grout cleaning without the hassle?

For the first time in history you no longer have to get on your knees with a toothbrush or brush with some kind of deck brush and fight with smelly chemicals that don't work. At Swift Restoration and Cleaning, we use the latest cleaning systems to blast old soil in your grout line quickly and effectively.

When you see the dirt disappear right before your eyes, you'll be amazed! You won't have to wait either, with just the first few lines we clean you'll see the difference.

Take the Swift Grout Line Cleaning Challenge

Swift Restoration will give you a FREE tile and grout cleaning demo so you can prove it to yourself.

Schedule any Carpet or Upholstery cleaning and you'll instantly qualify for your free tile and grout cleaning demo. Just make sure you let us know "before" coming out, so we can block out enough time to make it look like new again.

If you just want to take advantage of the free demo, you should call now! Swift Restoration can only do 7 demos per month. That's it. Once they are all gone we will not give out anymore. The reason for this is that I'm fortunate to have great clients who clean with me often, even during what usually is our slower period, and since they keep us busy and I have a small staff of caring technicians, I have to limit how many free demos I do each week.

When you call please give us an approximate size (square feet) of the tiled area you'd like cleaned. We'll schedule a date for you right on the phone, give you a few instructions on how to prep for our arrival, and that's it. Best of all, you'll get to see your

tile & grout lines come back to life and see what your neighbors have been raving about.

All I ask is if you like what you see, then let us give you a quote, and tell your friends. Is that fair? Oh by the way, I would love to hear your thoughts on how we did so we can share them with others, as your testimonial is much appreciated. But only after you see the demo can you decide. It's that easy. Call now, schedule your cleaning, then test-drive it for yourself.

What You Will Get If You Decide To Try Us Out

- You'll get the tile & grout cleaning you deserve.
- You'll see a dramatic difference right before your eyes.
- You'll see the color the grout line use to be.
- You'll Be Amazed! That's why you must see it to believe it.
- Don't take my word for it...See for yourself!

Ask yourself this... what will happen if I do nothing?

1. The grout lines will remain soiled.
2. The grout will never sparkle like it used to.
3. Your tile & grout will continue to look dull.

For free friendly advice or if you have any questions or concerns just email me at darin@swiftrestoreutah.com or call Swift Restoration and Cleaning at (801) 657-3496.

[Upholstery Cleaning In Ogden UT](#)

Looking For Ogden Upholstery Cleaning Company? Swift Restoration and Remodeling Offers Water Damage, Sewage Cleanup, Mold Remediation and more Restoration Services In Ogden And Its Surrounding Areas.

[Ogden Upholstery Cleaning Company](#)

You have probably spent a great deal of time (not to mention money) choosing just the right furniture for your home. The look and the feel of new furniture is something we wish would last for a long time. However, most people don't just keep their furniture as pieces of art. They are well-used and well-loved fixtures in our homes.

To make sure the investment is worth it, there are a few things that should be done when it comes to caring for your furniture.

Upholstery Tips

- One of the best ways to prevent colors from fading is to keep your furniture out of

direct sunlight.

- Vacuum your upholstered furniture as much as possible. Remember, dust settles on upholstery just as much as it does on a hard surface such as a floor or a shelf of knickknacks.
- Avoid leaving newspapers on your furniture. Ink can accumulate and is very hard to remove.
- Don't cover your upholstery with dark-colored blankets or sheets. The dyes can rub off onto other fabric when dry or bleed when wet.
- For high-use furniture, it's a good idea to beat the cushions (often) and then vacuum and rotate them. This can help in distributing the wear. Do not remove cushion covers for dry cleaning or machine washing even if they have zippers. Remember, all upholstery fabrics are different and can't be cleaned the same way.
- Before using a store-bought spotter, check the labels on your furniture.
- Furniture makers now attach tags with cleaning codes noted. "W" means it is wet-cleanable, "S" means solvent-clean, "W/S" means either wet or solvent clean and finally "X" means dry vacuum only. No type of cleaning agent whatsoever can be used on this type of fabric. Generally, cleaning should be done between 1 and 2 years depending on the furniture's location, use and exposure to soiling. The American Furniture Manufacturers Association states that if a fabric is exposed to excessive or heavy soiling, it may be permanently stained. Our goal is to remove normal soiling without changing the color, texture or finish of a fabric.
- Before cleaning, you should tell the technician how old the furniture is, if you have used any spotters or cleaners on it yourself or if the piece has ever been reupholstered. Depending on the type of fabric, different methods of cleaning will be used by us.
- Dry solvent cleaning is thought of as the safest method of upholstery cleaning. The upholstery shampoo method is quick & effective and dries quickly. Dry foam cleaning is similar to the shampoo method but it uses less moisture so it dries even faster. Hot water extraction cleaning is the most effective way to remove heavy soils, provided the fabric is compatible with this method. This is also the preferred method for restorative cleaning and for sanitized cleaning.
- Applying fabric protection can increase the life of your upholstery. However, it does not eliminate the need for proper fabric care. It doesn't put a plastic cover on it. Loose dirt should still be vacuumed up on a regular basis and spills and stains should be cleaned away as quickly as possible.
