

June 1, 2021 | School Improvement Report | Prepared for the Lane ESD School Board

- Last year, an advisory committee came together to conduct an evaluation on the effectiveness and usefulness of the Oregon Data Suite Dashboard. At our curriculum leaders last month, we shared with folks what we did and what we learned when we looked more closely at the survey results. We also discussed with them HOW the experience/evaluation process is shaping the strategies and structures that we (Lane ESD and ODS) will deploy to better meet their needs regarding data access. Go [HERE](#) to view the full presentation that Carlos and Matt Hayes shared.
- A second topic for discussion was “Using data as a lever for equity rather than a tool, here is the [Slide Deck](#) if you’d like to learn more about this topic. Jaelen Barnett and Sue Wilson facilitated the conversation on how we can improve school, district, and community cohesiveness by utilizing data that will inform strategic planning efforts. The goal is to create and maintain long lasting relationships that will help data and equity teams fully engage major stakeholders, specifically SIA focal groups, to improve academic outcomes. A very helpful resource shared was [Dr. Rich Milner video](#) - 5 tenets educators can utilize now to create whole and healing schools where every student matters.
- Lane ESD School Improvement Professional Learning/Training Opportunities, Events, Summer Programming and Activities June- August, check out the site below. It’s going to be a summer of learning!!!
