EXPERIENCE

Monite, Berlin, Germany (Remote) — *Frontend Developer*

JUNE 2022 — PRESENT

- Orchestrated architectural solutions for the public UI library, achieving a 20% reduction in load times and streamlining integration for an elevated user experience.
- Established a component showcase through Storybook, authoring public documentation that resulted in a 25% decrease in support ticket requests related to embedded components, showcasing heightened developer comprehension.
- Implemented a token-based theming system for the UI Kit, reducing design change implementation time by 20% and fostering development agility.

Tinkoff Bank, Moscow, Russia (Remote) — *Frontend Developer*

FEBRUARY 2021 — JUNE 2022

- Engineered UI for a data quality service, securing additional budget and new developers, leading to a 20% boost in project capacity.
- Accelerated development and reduced errors by implementing an auto-generation system for models from OpenAPI, resulting in a 30% increase in development speed and a 20% decrease in error occurrences.
- Enhanced client-server communication by implementing GraphQL over REST API, resulting in a 25% reduction in data transfer times.
- Teamed up with a designer, actively engaged in customer interviews, identifying user pain points and contributing to a measurable 20% improvement in user satisfaction.

sibedge, Tomsk, Russia (Remote) — *Frontend Developer*

JANUARY 2019 — FEBRUARY 2021

- Developed the UI for a monitoring dashboard in the power industry, achieving a 95% satisfaction rate in customer acceptance tests.
- Led a team in creating a document management platform, resulting in a 40% reduction in paperwork for the customer.

- Implemented a refactoring process for an existing application, reducing the time required for developing new features by 25%.

AIM, Bryansk, Russia — *Frontend Developer*

DECEMBER 2017 — JULY 2018

- Launched a promotional website for the heavy vehicle marketplace, yielding a 15% increase in user engagement within the first month.
- Refactored a legacy project that used Backbone.js, resulting in a more streamlined onboarding process for new developers.
- Mentored 2 interns, both seamlessly integrating into the team.

Bryansk Soft, Bryansk, Russia — *Frontend Developer*

FEBRUARY 2017 — JULY 2017

- Created 30+ React UI components integral to the cryptocurrency exchange platform.
- Integrated third-party charts, enhancing the visualization of financial analytics data.

Advertise.ru, Bryansk, Russia — *Web Developer/Technical Support*

MARCH 2013 — FEBRUARY 2017

- Developed 20+ landing pages with a focus on responsiveness and clear code structure.
- Integrated APIs for over 50 partners, streamlining data exchange processes.
- Managed the development, launch, and support of four corporate websites, leading to increased user engagement.
