

## **Five Phases Acupuncture**

(五段階鍼 Godankaihari)

---

**Five Phase Acupuncture** (五時期鍼術, *Gojishinjutsu*) is a type of Medical Technique that utilizes the art of acupuncture to fight and heal. It is used by Chowa Sozo and was created under the teachings of Takewa Sozo. It is based on ancient natural medicine found within a mysterious book his adopted father gifted him. It is emphasized in strong, fast attacks with the fingers and/or needles to strike pressure points and vital points on the body for various effects.

The skills of the Five Phases Acupuncture utilize Chowa's [Igaku Chakra](#) that he has thanks to his Sozo Clan lineage alongside other aspects. Under the training of Takewa his skill in medicine has skyrocketed which allows him to use his needles as a medium for his Medical Techniques allowing for an extended range of use. Five Phase Acupuncture has a number of applications making it extremely versatile.

## **Five Phases Acupuncture: Twelve Point Restriction**

Gojishinjutsu: Jūni Chiten No Seigen

五時期鍼:十二地点制限

**Classification:** Medical Nintaijutsu

**Nature:** N/A

**Rank:** A

**Class:** Offensive

**Range:** Close to Mid Range

**Hand Seals:** None

**Creator:** Chowa

### **Description**

This technique makes use of the Chowa's signature Silver Chakra Needles. By striking certain points along the twelve primary meridians that make the chakra pathway system the user can effectively restrict the target's movement and chakra flow while leaving their nervous system unaffected allowing for them to still feel pain. The technique is designed to stop the body from causing the target to pass out meaning that no matter the level of pain they will not lose consciousness.

While under the Twelve Point Restriction the target experiences debilitating pain and is unable to move, though the true danger of this technique lies in the needles themselves. If they aren't removed correctly by a highly skilled medic i.e. Heiwa, Tsunade, Hashirama etc, there is an extremely high chance the pain inflicted by the incorrect removal can destroy the mind and kill the target. Though people of high-level regeneration such as Heiwa would be able to tear the needles out with no permanent or lasting effects due to their regeneration. This technique has been stated by those who have survived to feel like they were stuck in a waking Genjutsu with no escape.

## **Five Phases Acupuncture: False Recovery Technique**

Gojishinjutsu: Ayamatta Kaifuku No Jutsu

五時期鍼術: 誤った回復の術

**Classification:** Medical Nintaijutsu

**Nature:** N/A

**Rank:** C

**Class:** Support

**Range:** Close to Mid Range

**Hand Seals:** None

**Creator:** Chowa

### **Description**

Five Phase Acupuncture: False Recovery Technique is an acupuncture technique designed to be a quick battlefield medical technique. It was developed by Chowa Sozo as a way to speed up the healing process on the battlefield.

The concept of the technique is for the user to focus Medical Chakra or preferably Igaku Chakra at the tip of his index finger before striking a number of pressure points. The chakra stimulates the cells within the body causing any and all injuries to heal and bleeding to stop, though unlike most medical jutsu the speed at which this work comes with a heavy drawback as the user's injuries are only healed temporarily and will re-open if not properly treated by the end of the duration of the technique. This can allow one to continue fighting after suffering injuries., though if one does choose to fight on the injuries sustained from then on will not heal and will pile onto of the old once it wears off.

## **Five Phases Acupuncture: Limit Removal**

Gojishinjutsu: Seigen No Sakujo

五時期鍼術: 制限の削除

**Classification:** Medical Nintaijutsu

**Nature:** N/A

**Rank:** S

**Class:** Support

**Range:** Self

**Hand Seals:** None

**Creator:** Chowa

### **Description**

The Limit Release is a basic and simple technique that anyone who has knowledge of the tenketsu points in the body can use. Though even though anyone can do it, its usage is forbidden as it has deadly side effects. The technique is activated by hitting a pressure point in the brain with a finger surrounded by Igaku chakra. Once this is done the limiters on their body are removed temporarily. This allows one to attain even greater strength at the cost of risking their own life. After the first use it can be repeated, but with a different effect.

From the second usage onwards it is said to double the user's physical abilities and chakra production at the risk of permanent damage to the body if they cannot handle the immense strain. The reason for this as this jutsu converts one's own life force into chakra. this means that the stronger one's life force, the greater the power one can obtain. Chowa has never passed one use and has only known one person who's managed to survive the second usage without dying, though it has left them crippled. It is theorized by Chowa that exceeding two usages is suicide unless your body can heal from life-threatening damage in mere moments.

## **Five Phases Acupuncture: Painkiller Technique**

Gojishinjutsu: Chintsū-zai

五時期鍼術: 鎮痛剤

**Classification:** Medical Nintaijutsu

**Nature:** N/A

**Rank:** S

**Class:** Support

**Range:** Self

**Hand Seals:** None

**Creator:** Chowa

### **Description**

The Painkiller Technique is the most dangerous technique after the Limit Release. It was created by Chowa after reading books on acupuncture and pressure points. It is used to block the users or someone else's pain receptors.

This technique is used to stop those affected from feeling any physical pain and is done by hitting a pressure point in the heart. This allows the user to fight to the limit of their power without being hampered by pain from injuries. This is, however, dangerous, seeing as the notification of pain and serious injury is a defence mechanism of the body in order to keep people alive. The technique can be used in combination with Limit Removal, but it is theorized by Chowa that the combo has a 99.9% chance of causing death after they wear off.
