

Enter one of the queues in front of the MGM Cartoon Studios, a replica of the original. Left goes to the mouse side and the cat side on the right (identified with signs)

MOUSE SIDE:

Posters for Tom & Jerry shorts and a few other MGM cartoons on a wall on the right and to your left is the Animation Courtyard. You soon approach the background department, located inside.

The Background department has a soundstage like atmosphere. The Background department includes backdrops for a Texan ranch, a building under construction, a concert hall, a French royal hall, the beach, and a backyard at night. Far end has a set for a birthday party.

After seeing a few more backdrops, you exit and are now located closer to the posters. Eventually you enter a doorway located under a sign labeled Stage 19.

It's themed to Jerry's mouse hole, it has all the amenities you expect: a couch, a television, and lots of cheese all larger than life. On the bare walls are portraits of Jerry's family such as Nibbles, Muscles, and Uncle Pecos. The mice vehicles in the loading room enter from one mousehole and will take you into Jerry's personal bedroom.

CAT SIDE:

Posters for Tom & Jerry shorts and a few other MGM cartoons are on a wall to your left and the Animation Courtyard to the right. You approach an indoor queue portion that takes you inside the prop department.

The Prop department includes vanishing cream, the world's largest diamond, many mouse traps, a book titled *Life with Tom*, large crates full of tacks, one of Tom's blueprints, and baseball bats. At the far end of the queue before it switches back on itself is a table with a bunch of small wind up toy cats and mice. You soon exit the prop department and go back into the outdoor queue. Eventually you enter a doorway located under a sign labeled Stage 4.

In Stage 4 you enter through the kitchen that has been damaged by Tom and Jerry's antics. On the table, there are packages that have cat and mice toys that can be seen through the wrecked packaging.

You enter a different room that looks to be a banquet room that hasn't been set up yet. After some switchbacks, you go into the loading area with the wind up cats where they'll go under the staircase.
