

CryptoMonkz DAO

Expansion proposal

Proposal # 21
Name Wilder World Trinity
By Dizzy & Basil Cabbagemaker (Pirates)
Date 30th May 2023

Introduction to Monkz Trinity in Wilder World

The CryptoMonkz DAO ("DAO", "the DAO") is seeking to continue collaboration efforts and expand metaverse options for Monkz down the road with communities actively building.

The DAO is looking to support Frank Wilder through a secondary purchase of 3 Wilder World NFT's which would commonly be referred to as a Trinity. This consists of Wheels, a Wolf and a Moto which would cost altogether around 0.9 ETH including gas if the floor was bought today.

NFT (as of 5/30/23)	Floor Price (ETH)	Supply	Volume (ETH)
Wilder World (Wheels)	0.26	7346	6001
Wilder Beast : Wolf	0.449	3333	2159
Wilder Moto's	0.14	6396	628

Wilder World Bio: Collect Rare NFTs for In-World Utility and Holder Benefits in Wilder World, The World's First Fully Decentralized and Community Owned Photorealistic Metaverse Project. Wilder World is a New Dimension of Reality powered by the \$WILD Token and Built on Ethereum, Unreal Engine 5, and ZERO.Tech.

Based on current floor price, this proposal asks that the community approve a budget of up to but not exceeding 1.25 ETH from the 134 ETH Available inside of the DAO. There is an optional purchase of a Wilder Beast: Wape and some WILD token, which is the unit to interact with the game itself as well if budget allows.

PROPRIETARY AND CONFIDENTIAL

The intent behind this purchase is to show support to our collaboration partner, Frank Wilder who is a Monkz holder. The further benefit to our DAO is if we are holding a trinity, we will get Genesis Land mint claims (gas cost only). when that becomes available and interactable. This is expected to happen in the fall or winter of 2023. Holding a trinity gives us access to a variety of futures mints including the first player avatar expected later this year.

At any time, any DAO member can raise a proposal which, if successful, can initiate the sale of the above assets. The risk to the DAO is the NFT's become worthless and losing all of the cost surrounding the asset purchases. The benefit to the DAO is nurturing further collaboration, providing a bump in social media presence connecting both communities again, maintaining relevance in the space, and having assets inside of a gaming ecosystem that is actively building and growing.
