Abstract: (At least 300 words)

Paper 2 Title:

Author(s):

Affiliation:

Country:

Abstract: (At least 300 words)

Paper 3 Title:

Author(s):

Affiliation:

Country:

Abstract: (At least 300 words)

Paper 4 Title (optional):

Author(s):

Affiliation:

Country:

Abstract: (At least 300 words)

Paper 5 Title (optional):

Author(s):
Affiliation:
Country:
Abstract: (At least 300 words)

This section critically evaluates existing policies and examines alternative policy options. It analyzes the strengths and weaknesses of each option, considering factors such as feasibility, effectiveness, costs, benefits, and potential risks or unintended consequences. The purpose of this section is to provide an evidence-based assessment that informs sound policy decision-making.

3. Policy Recommendations

The policy recommendations section presents clearly argued and actionable proposals for policy change. It explains why current policies are insufficient and need to be amended, drawing directly on the analysis and evidence presented earlier in the paper. While the recommended option does not need to be a definitive or guaranteed solution, it must be logically justified, realistic, and aligned with the policy objectives and institutional context.

Appendices/References(APA Style)

Note:

The recommended word limit for the policy paper is 1,000–3,000 words. Authors are requested to submit their papers in MS Word format.

This template serves as a general guideline and is not mandatory. Authors may adapt or modify the structure of their policy papers according to their research objectives, policy focus, and contextual requirements.
