

Camera & Equipment Sign Out:

Once students and parents have signed the Camera Care and Equipment Contract students may check out and reserve camera equipment. During the Spring semester when there is a photography class, it is required that these cameras and tripods all be present during class time, as we will have studio work and assignments to complete. If you have a camera checked out and do not bring it to class, this will affect your grade. All photography students are required to check out cameras during the semester. If you do not check out and utilize camera equipment you will be unsuccessful in the course, as much of this course is practice in developing a technical understanding for photography and composition.

Camera Care Guidelines:

Do not leave your camera out in the cold.

Always charge your camera battery before returning it.

Use two hands when holding your camera.

Do not let other students use your camera.

Always store your camera and equipment in the proper bag.

Keep your camera clean and away from water.

If your camera is damaged. Please report it to your teacher immediately.
