

The consequence of Drug Abuse

Introduction and Materials

My project is about the consequences of drug abuse and how a variety of drugs affect the human body in various ways. From your heart to your brain. Drugs affect many different organs of the human body and have destroyed millions of life's. The materials I used to complete this project was a display board and a computer to find information

How does it work?

The project display board shows what drugs do to your body and how it affects the human organs.

It shows how drugs are bad and the things and outcomes that can happen. For example an outcome of alcohol is violence.

What is going on?

I am showing the consequences of drug abuse.

What is the scientific principle behind it?

Drugs are harmful to the human organs.

Which topics are covered?

The topics that I covered varied from marijuana, alcohol, cocaine, needles, cigarettes, heroin and meth.

Which did you scientific principles/concepts you learn?

The concepts that I learned were that drug abuse destroys you.

Use formulas and figures if required.

None
