School Information

Grades served: K4–8
Address: 2920 W. Grant St.
Milwaukee, WI 53215

State Report Card

Rating: Meets Expectations
(3 stars)
Overall score: 66.4

Instruction

Evidence-based improvement strategy: Professional learning communities (PLCs)

Theory of action: If we implement professional learning communities grounded in shared mission, vision, and values then teachers/staff will develop collective efficacy, deepen their instructional expertise, consistently deliver grade-level rigorous instruction, and take shared ownership for all students' academic success, and students will demonstrate increased achievement on grade-level standards, engage more deeply in learning, and show accelerated growth across all demographic groups, as evidenced by every student in our district showing a minimum of one year's worth of growth in literacy and math by the end of the 2025–26 school year.

Climate and Culture

Evidence-based improvement strategy: Multi-level system of supports/multi-tiered system of supports (MLSS/MTSS)

Theory of action: If we provide equitable and consistent practices and interventions throughout the district's multi-level system of supports/multi-tiered system of supports (MLSS/MTSS), then school teams will regularly monitor school, student, and staff data, systems, and practices supporting all aspects of the school community, and teachers/staff will provide racially, culturally, and linguistically conscious key components of school climate, evidence based practices, and tiered interventions, so that students will feel safe, secure, and welcomed to school on a daily basis.

School Vision & Values

School Vision

The vision of Grant is to prepare our students to meet or exceed proficiency in state standards in all subject areas, so they are successful in their future educational endeavors while becoming contributing members to society."

School Values

Our staff at Grant holds high expectations for individual achievement. Our student centered curriculum focuses on educating the whole child with an emphasis on learning by integrating technology in the areas of reading, language arts, science, social studies and mathematics. We provide experiences for children that motivate them to become better prepared to meet the demands of the 21st century. These experiences develop the child intellectually, socially, emotionally, and physically, so they are able to make meaningful decisions in our society."
