

Effective Date: [10 July 2025]

This Privacy Policy describes how the "Emptio" Chrome Extension ("Extension", "we", "us", or "our") collects, uses, and protects your information.

1. Information We Collect

This extension does not collect, store, or transmit any personal information.

The only data processed by this extension are URLs you explicitly provide through an externally connected app or local page. The extension then retrieves the publicly available HTML content from those URLs in the background and returns it to the sender.

We do not:

- Collect user credentials
- Track browsing activity
- Store scraped data
- Share any data with third parties

2. How We Use Information

The extension only uses the provided website URLs to fetch their HTML content temporarily in memory for immediate response. This is done solely based on user-initiated actions via external apps.

3. Local Operation

All operations happen within the user's browser. No data is sent to any external server controlled by us.

4. Permissions

The extension uses the following permissions:

- `host\_permissions` (`\*:///\*/\*`) — to fetch HTML from any user-specified site
- `offline` — to enable background HTML scraping without UI
- `tabs` and `scripting` — required by the Chrome Extensions API to execute code within background/offscreen contexts

5. Third-Party Websites

The extension may access third-party websites based on the user's input. We do not control, endorse, or take responsibility for the content or policies of those websites.

6. Updates to this Policy

We may update this policy from time to time. Changes will be posted here and reflected by the updated effective date above.

7. Contact

If you have any questions about this privacy policy or how this extension works, please contact us at:
