Thank you very much for agreeing to the interview. We are conducting a study to understand how we can offer a better solution for organizing your photo gallery. During our conversation, I will be taking notes, trying to be as efficient as possible. Can we start?

First, please tell us about your experience in photography.

How often do you take photos, what do you use for shooting, how do you choose your photos, etc.? (Optional)

Do you sort/delete blurry or too dark photos? If so, how inconvenient is it for you to manually delete and sort photos?

We have provided you in advance with access to the user interface prototype and the working version of our product. The following questions will be about your experience using the user interface prototype:

- How do you generally like the user interface prototype? What pros and cons can you highlight?
- Did you find the prototype understandable, and how convenient was it to use? (on a scale of 1 to 10)
- Do you have any questions about using the prototype?

The following questions will concern your experience using the working version of the application. Let me remind you that the application interface matches the user interface prototype:

- Did you try uploading your photos to the application?
- Did you encounter any difficulties while using the application?
- Do you have any questions that I can answer right now?
- Does this application solve the problem of manually sorting photos?

Thank you once again for your time. When the application is released, can I hope for your continued use and feedback? Thank you very much, we will keep you updated.
