

Steps to contribute to the guide

***** you must create a new branch when submitting a new PR....and then continue to push changes to that branch.**

Step 0: Github Desktop

Open Github Desktop and sync with the latest branch of the guide

Step1: Google doc

Open Google doc with your content

Step 2: Figma

Open Figma file with the images

- Images should be the following [sizes](#) to match the guideline of the guide

Step 3: Code editor

- Create a new page by duplicating an already existing page and renaming it
- Add in the content to editor

Step 4: Edit nav order + headings

Then edit the top part of the code and the bottom part of the code

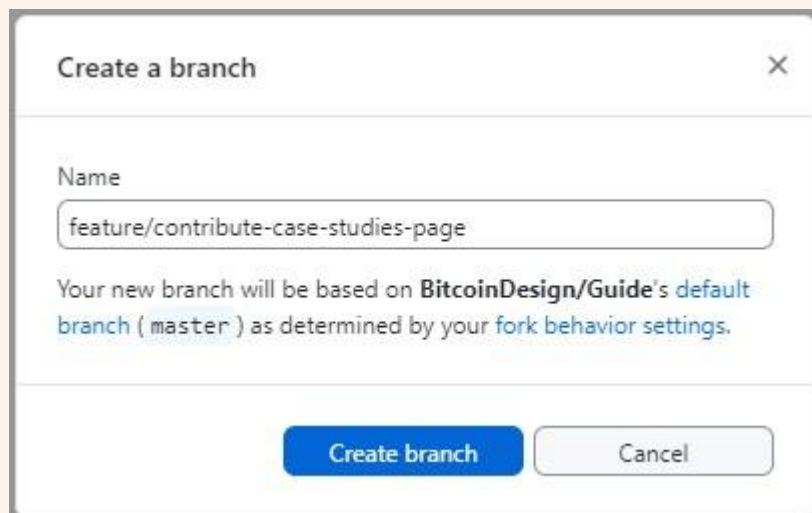

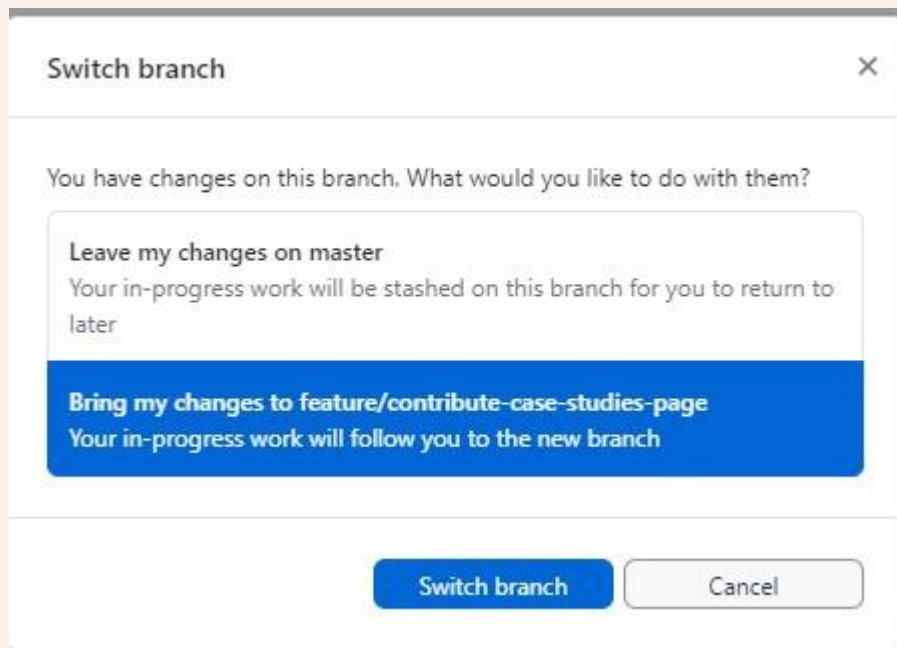

```
layout: guide
title: Case Studies
description: How to contribute case studies to the guide
nav_order: 10
parent: Contribute to guide
permalink: /guide/contribute/case-studies/
main_classes: -no-top-padding
image:
https://bitcoin.design/assets/images/guide/contribute/contribute-preview.jpg
---
```

```
{% include next-previous.html
previousUrl = "/guide/formatting/"
previousName = "Formatting"
nextUrl = "/guide/glossary/"
nextName = "Glossary"
%}
```

Step 5: Add in images.

1. Export images according to the recommended sizes
2. Label them descriptively
3. Open Atom and drag the images into the Images folder (ensure that they are being dragged into the correct folder)
4. On Atom editor add in the link to the images

Create a new branch on Github

Write a clear description of the PR you are creating

Step 6: Deploy Preview

Add in the link to the deploy preview in the first few lines of the PR.

**** navigate to the correct page of the deploy preview before adding it.**

******* Check the preview on mobile for the retina images

******* Making changes:

Ensure you are on the correct branch on Github desktop and then push any changes to that branch

[Fix image cache error how to](#)

Step 7:

Check that all linked documents are view only

Update previous and back links at bottom of the page before and bottom of the page after

Internal links:

```
[The Payjoin experience]({{ '/guide/case-studies/payjoin/' | relative_url }})
```
