List of Practical Skills for the Final Module Assessment

Organizational and Methodological Skills

- Completion of oncology-related medical documentation, including:
  - **Notification of a Patient with a Newly Diagnosed Malignant Neoplasm** (Form No. 090/o);
  - **Extract from the Medical Record of an Inpatient with a Malignant Neoplasm** (Form No. 027-1/o);
  - **Protocol for the Detection of an Advanced Malignant Neoplasm in a Patient**;
- analysis and interpretation of the protocol documenting the detection of an advanced malignant neoplasm;
- formulation of an oncological diagnosis, including determination of the disease stage and clinical group.

Diagnostic Skills

- interpretation of laboratory investigation results in patients with malignant neoplasms;
- interpretation of radiographic, CT, MRI, and scintigraphic findings demonstrating typical features of malignant neoplasms in various organs;
- interpretation of the results of cytological, histological, and other morphological examinations of tumors;
- clinical examination and palpation of the breasts with interpretation of the findings;
- performance of needle biopsy and collection of cytological material, including touch imprints and tumor scrapings;
- assessment of the psychological status of an oncology patient.

Clinical Decision-Making and Treatment Planning Skills

- development of an appropriate diagnostic work-up plan for a patient with suspected malignant neoplasm;
- development of a follow-up examination plan for an oncology patient after radical treatment;
- development of an individualized preliminary plan for combined and multimodal treatment of a patient with a malignant neoplasm;
- development of a symptomatic and supportive treatment plan for a patient with advanced cancer;
- development of a plan for providing psychological support to oncology patients and their family members.
