

Irving ISD strongly encourages parents/guardians to establish a medical home for student athletes for annual sports physicals as well as regular general healthcare. Regular visits to a primary care provider, who has knowledge of personal and family history, help to ensure consistent and quality healthcare for annual well-child exams, sports physicals and general healthcare. If your student athlete does not already have a medical home, we have partnered with local Irving clinics to provide options for helping each student athlete establish a primary care provider. These options are provided below. If you have any questions or concerns, please don't hesitate to contact one of the district's athletic trainers. Contact information for our district athletic trainers can be found on the following website. <https://www.irvingisd.net/departments-services/athletics/sports-medicine/sports-medicine-home>
