IF YOU WANT TO USE ANCHORS:

1. Create your anchor point. This will look something like this:

```
[anchor]ANCHORNAME[/anchor]
```

You'll want to leave 2 empty lines between your anchor point and your text, since the Chaos top bar will obscure about 3 lines, starting with the anchor.

2. create the anchor link. This is done by taking the page link from the url bar at the top:

<https://www.starwarsrp.net/threads/bernard-of-arca.99837/>

3. and then adding this bit: #message-anchor-ANCHOR to the end of your thread link, like so:

<https://www.starwarsrp.net/threads/bernard-of-arca.99837/#message-anchor-ANCHOR>

4. Replace the ANCHOR with the name of the anchor point you want the link to lead to and use this link as the URL for the clickable link in your post like this:

```
[URL=https://www.starwarsrp.net/threads/bernard-of-arca.99837/#message-anchor-ANCHOR]Clickable Text[/URL]
```

CODE FOR INTELLIGENCE BIO TEMPLATE

1. The spacing of this bio is finicky. Please do **not** try to space the coding out or make it look cleaner or easier to read. Spaces between divs will change their location on the picture template-> things will not line up.
 - a. Spaces inside text boxes are perfectly fine :)
2. If you want to add a category, you'll need to add an anchor for it. If you want to remove one, delete that section and be sure to grab it's anchor at the top of the div.
3. Editable text highlighted for convenience
