### Abstract

[Write in English, Cambrian font 10, justify, 1 space, **consists of a maximum of 150 words**, contains the background of the problem, the urgency of writing/research, research methods, important research results, and conclusions]. For example, The commissioner of the general election administration was discharged through the decision of the General Election Administrator Honorary Council (DKPP). The decision is not final and binding at the executorial level, considering that the decision can be canceled by the Administrative Court. This study aims to define the authority of DKPP and PTUN in resolving ethical violations committed by election administrators and parse the implications and relationships of the decisions of the two institutions. This paper also proposes an ideal concept for the design of solving ethical violations of election administrators in the future. This study uses normative juridical methods. The results showed that the DKPP and PTUN have overlapping authority but with different decisions. DKPP purely adjudicates ethical issues, and the Administrative Court adjudicates the Presidential Decree, which is a follow-up to the DKPP decision. To avoid conflicting decisions on cases that intersect, violations of the code of ethics in the future must be resolved with a settlement mechanism by the judiciary.

### Abstrak

[Ditulis dalam bahasa Indonesia, Cambria font 10, justify, 1 spasi, terdiri dari **maksimal 150 kata**, memuat latar belakang masalah, urgensi penulisan/penelitian, metode penelitian, hasil-hasil penting penelitian dan simpulan]. Sebagai contoh, Pemberhentian komisioner penyelenggara Pemilu melalui putusan Dewan Kehormatan Penyelenggara Pemilu (DKPP) tidak bersifat final dan mengikat pada tataran eksekutorialnya mengingat putusan tersebut dapat dibatalkan oleh Pengadilan Tata Usaha Negara. Penelitian ini bertujuan untuk menguraikan kewenangan DKPP dan PTUN dalam penyelesaian pelanggaran etik yang dilakukan oleh penyelenggara Pemilu sekaligus mengurai implikasi dan relasi putusan dari kedua lembaga tersebut. Penelitian ini dilakukan dengan menggunakan jenis penelitian yuridis normatif. Hasil penelitian menunjukkan bahwa DKPP dan PTUN memiliki kewenangan yang saling beririsan namun dengan putusan yang berbeda. DKPP murni mengadili persoalan etik dan PTUN mengadili Keputusan Presiden yang merupakan tindak lanjut dari putusan DKPP. Dalam rangka untuk menghindari konflik putusan atas kasus yang beririsan maka atas pelanggaran kode etik dimasa mendatang harus diselesaikan dengan mekanisme penyelesaian oleh lembaga yudikatif.

## A. INTRODUCTION

### 1. Background

The background section elaborates on the reasons why it is considered important to conduct research, analysis/review of decisions of the Constitutional Court or other relevant judicial institutions, theoretical studies, literature studies or conceptual critical ideas that will be presented.

This section should also outline previous research and the differences between the analysis and the article being written as well as the novelty of the research.

At the end of the background, the author should conclude with a brief explanation of the findings of the research conducted.

The background is written with Cambria 12 writing style, justify, 1.5 spaces, the first paragraph indented, writing sentences between paragraphs with no spaces (no before and after spaces).

Citation is done in the form of footnotes/footnotes with the Chicago Manual of Style 17th edition format (full note) using Mendeley's Reference Manager. An example of citation with footnotes can be seen as follows<sup>1</sup>

before and after space). This section describes the research results and discussion based on the analysis method used. The description of the discussion must be adjusted to the sequence of legal issues that are the main elements in the study. Theories included in the theoretical framework must be cited in this chapter.

The writing of the results and discussion may be supplemented with supporting graphs, tables or figures. The systematization of the results and discussion must refer to the formulation of the research problem.

Tables must be clearly readable and have at least 300 DPI (Dots Per Inch) resolution for good printing quality. Tables are made with an open model (without vertical lines). An example of a table can be seen below:
