

## SOFTWARE DEVELOPER , REACT JS

Apply at : [careers@symboinsurance.com](mailto:careers@symboinsurance.com)

### About Symbo

Symbo is an Insurtech company disrupting the way insurance products are distributed. Historically, Insurance has been a push product and always been "sold". We are turning that on its head and are making insurance a product that is "bought" by the customer. By embedding highly contextual insurance products in the user's buying journey, we make the entire purchase experience highly relevant, intuitive and seamless for the user.

Our comprehensive product portfolio, coupled with our powerful CoverGateway API platform makes us the trusted coverage partner for some of India's leading ecommerce, retail and fintech brands. Founded in the year 2017, we are a team of over 100 people with offices in Mumbai and Singapore. Symbo is backed by reputed VCs like Integra partners, Insignia ventures, AJ capital and Credit Ease.

### A Quick Summary of the role

We are looking for a great JavaScript developer who is proficient with ReactJS. Your primary focus will be on developing user interface components and implementing them following well-known ReactJS workflows (such as Flux or Redux). You will ensure that these components and the overall application are robust and easy to maintain. You will coordinate with the rest of the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

### Roles & Responsibilities

1. Developing new user-facing features using ReactJS
2. Building reusable components and front-end libraries for future use
3. Translating designs and wireframes into high quality code
4. Optimizing components for maximum performance across a vast array of web-capable devices and browsers

### Requirement

1. 4 plus years experience in UI development
2. B.E. preferred
3. Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model

4. Thorough understanding of ReactJS and its core principles
5. Experience with popular ReactJS workflows (such as Flux or Redux)
6. Knowledge of modern authorization mechanisms, such as JSON Web Token
7. Familiarity with RESTful APIs
8. Familiarity with newer specifications of EcmaScript
9. Experience with data structure libraries (e.g., ImmutableJS)
10. Knowledge of isomorphic React is a plus
11. Familiarity with modern front-end build pipelines and tools
12. Experience with common front-end development tools such as Babel, Webpack, NPM, etc.
13. Ability to understand business requirements and translate them into technical requirements
14. A knack for bench-marking and optimization
15. Familiarity with code versioning tools such as Git, SVN, and Mercurial
