

Student Name ( )

Period ( )

Date of Activity ( )

Activity # ( )

**Directions:** Now that we've nearly completed an entire unit of science, let's have some fun outdoors, in nature! Go outside and find something interesting, intriguing, and new! Time yourself while you are on your hunt. You must create a video, showing your findings (1-5) and explaining the science connection (6-8). Please apply your observations back to the area of study we have just finished, or are currently on, being as specific as possible. You will need to submit a shortened url so that your class can view your recorded activity.

Complete 1-10 below once you have completed your minimum of 30 minutes outdoors in nature.

\*\* 1-9: Video format required; \*\*7-9: Written response required; \*\*10: Print then complete

1. **My Outdoor Activity:** ( )

2. **Topic of investigation:**

During your activity, choose one or more object, living thing, interaction, and/or combination of any of the three to investigate.

*E.g., Ants lining up and heading into a small hole in the dirt, while carrying little crumbs of what looked like belonged to a muffin. Bigger ants seemed to be doing something different and there was much less of them. I only saw two compared to the 30+ other ants...*

( )

3. **Location & Duration of time participating in the outdoor activity (minimum 30 minutes):** ( )

4. **Who participated in this outdoor activity / nature hunt?** Answer all that apply.

- a. I went solo
- b. Suzuki peers: ( )
- c. Other friends: ( )
- d. Family members: ( )

5. **Observations during the activity:**

Be as detailed and descriptive as possible. Have you tried to include as many *senses* as possible in your description? *Hint: I know when you've used minimum effort to make your observations! Be thorough! :)*

( )

**6. Connection to science content:**

How is this investigation related to what we have just learned about in science class? Include as many science concepts that relate as possible, and elaborate on the relationship. Be specific!

( )

**7. Thought(s) and/or question(s) that stood out or came to mind during/after the activity:**

( )

**8. Research to discover more about my thought(s) and/or question(s) above. Cite your sources:**

( )

**9. Shortened URL / link to video recording of activity: ( ) \_\_\_\_\_****10. I verify that my child completed the Outdoor Nature Hunt as described above.**

**Parent Signature** x \_\_\_\_\_ **Date** x \_\_\_\_\_

**Parent, please list how you were involved in this activity:** \_\_\_\_\_

*E.g., I drove, I watched, I recorded, I timed, I gave suggestions, I asked questions to guide thinking, etc.*
