[Knowledge Start]:

Volkswagen said Wednesday that it has signed a deal to jointly develop two new electric vehicles for China with Chinese EV maker Xpeng . As part of the deal, Volkswagen will invest about $700 million in Xpeng, taking a 4.99% stake.

Xpeng’s U.S.-traded shares ended the day up over 26% following the news. Under the deal, Volkswagen and Xpeng will develop two midsize battery-electric models based on the platform that underpins Xpeng’s G9, a midsize electric crossover SUV.

In a separate statement confirming the deal, Xpeng said the two new vehicles will also incorporate its advanced driver-assist software.

The new EVs, which will be branded as VWs and sold only in China, are expected to launch in 2026.

Volkswagen is paying $15 per U.S.-traded share for its Xpeng stake and will receive a seat on the EV maker’s board of directors, subject to regulatory approvals.

Volkswagen also confirmed that its Audi subsidiary has signed a separate deal with its longtime Chinese joint venture partner, Shanghai-based SAIC Motor , to jointly develop new Audi-branded EVs for the Chinese market. The plan is to develop new EVs in segments where Audi does not currently have entries in China, the company said.

“We are leveraging the strengths of Volkswagen and our partners to create synergies to bring additional products to market faster,” said Ralf Brandstätter, Volkswagen’s China chief, in a statement. “In doing so, we focus on the specific needs of our customers in China. At the same time, we want to significantly optimize development and procurement costs.”

[Knowledge End]:

How much did volkswagen invest to XPENG?

ChatGPT:

Volkswagen invested about $700 million in Xpeng, taking a 4.99% stake in the Chinese EV maker.

Llama2-chat:

According to the information provided in the Knowledge section, Volkswagen invested around $700 million in Xpeng, which is approximately 4.99% stake.

[Knowledge End]:

How much did volkswagen invest to XPENG?

ChatGPT:

As per the provided knowledge, there is no mention of Audi directly investing in Xpeng. The information states that Volkswagen, which is the parent company of Audi, has signed a separate deal with its longtime Chinese joint venture partner, SAIC Motor, to jointly develop new Audi-branded EVs for the Chinese market. However, there is no information about Audi making any direct investment in Xpeng. The investment of about $700 million in Xpeng was made by Volkswagen, not Audi.

Llama2-chat:

According to the information provided, Audi did not invest any money in Xpeng. It's Volkswagen that invested around $700 million in Xpeng, acquiring a 4.99% stake in the Chinese EV maker.

[Knowledge Start]:

As with many free-to-play mobile games, you are able to spend real world money in Minecraft Earth. That's where Rubies come into play. These serve as the game's currency, which can be earned by playing or by buying with real money. Below, you'll find out How to Get Rubies and What They Do.

IMG 2493.PNG

How to Get Rubies

Rubies can be acquired by simply playing the game. As you walk around the world and collect items, you'll periodically be rewarded with Rubies. One way to get them is by completing Challenges.

ADVERTISEMENT

For example, completing two of the Daily Challenges may reward you with XP and Rubies. The Challenges are usually things you'd normally do anyway, but as the game gets updated more, these will likely get more complicated.

The other way to get Rubies is from collecting items in the world. Depending on the item you find, it may contain a Ruby.

What to Do With Rubies

You can use Rubies to buy Buildplates, which are pre-made structures set in various biomes. For instance, you can get the Grassy Pasture Buildplate, which comes with fences, flowers, and a set of grass in an 8×8 grid. There are lots of different Buildplates with different aesthetics, all of which are needed in order to start building.

You can check out our Buildplate guide for more info. Below, are all the Rubies you can buy with real-world currency.

Stack of Rubies (40) - $1.99

Ruby Block (100 + 5 bonus) - $4.99

Chest of Rubies (200 + 20 bonus) - $9.99

Cart of Rubies (400 + 50 bonus) - $19.99

Trove of Rubies (800 + 150 bonus) - $39.99

[Knowledge End]:

How to get the ruby?

ChatGPT:

To get Rubies in Minecraft Earth, you can acquire them through two primary methods:

1. Playing the Game: As you walk around the world and collect items while playing the game, you'll periodically be rewarded with Rubies. Additionally, completing challenges in the game can also earn you Rubies. For example, completing two of the Daily Challenges may reward you with XP and Rubies. These challenges are typically activities that you'd normally do in the game, and they may become more complex as the game gets updated.
2. Collecting Items in the World: Another way to obtain Rubies is by collecting specific items in the game world. Depending on the item you find, it may contain a Ruby.

These Rubies serve as the in-game currency, and you can use them to purchase Buildplates. Buildplates are pre-made structures set in various biomes, and they are essential for starting your building projects. Each Buildplate offers different aesthetics and features, making them valuable for players who want to create unique and diverse structures in the game.

In addition to earning Rubies through gameplay, you also have the option to purchase them with real-world money. There are different packages of Rubies available for purchase, and they come with various bonus amounts. However, you can also earn Rubies solely through playing the game and completing challenges without spending real money.

Llama2-chat:

Sure, I'd be happy to help! Here are some ways to get rubies in Minecraft Earth:

1. Playing the game: You can earn rubies by simply playing the game. As you walk around the world and collect items, you'll periodically be rewarded with rubies.
2. Completing challenges: Another way to get rubies is by completing challenges. The game offers daily challenges that reward players with experience points and rubies upon completion. The challenges are usually tasks that you would normally do during gameplay, such as collecting certain items or crafting specific objects.
3. Collecting items: Some items in the game contain rubies. You can collect these items to earn rubies.
4. Buying buildplates: You can also use rubies to buy buildplates, which are pre-made structures set in various biomes. These buildplates can be used to create structures in the game.
5. Real-world purchases: Players can also purchase rubies using real-world currency. The game offers various packages of rubies for sale, ranging from a stack of 40 rubies for $1.99 to a trove of 800 rubies plus 150 bonus rubies for $39.99.

I hope this helps! Let me know if you have any further questions.
