

Proposed WoT Profiles Plan 2025

- Goals:
 - EITHER
 - Publish WoT Profiles 1.0 as a Candidate Recommendation by October 2025
 - OR
 - Publish WoT Profiles 1.0 as a Working Group Note by July 2025
 - Write a Use Cases & Requirements document for WoT Profiles 2.0 by October 2025
- Meetings:
 - Suggest meetings every two weeks with most work happening asynchronously on GitHub
- Proposals:
 - [WoT Profiles 2.0 Strawman Proposal](#) (February 2024)
 - [Web of Things \(WoT\) HTTP Protocol Binding 2.0 - Strawman Proposal](#)
 - [Web of Things \(WoT\) HTTP Basic Profile 2.0 - Strawman Proposal](#)
 - [WoT Profiles 2.0 Use Cases & Requirements - Initial PR](#)
- Collaborations:
 - Use Cases Task Force (for high level use cases relevant to Profiles)
 - Thing Description & Bindings Task Force (to explore moving existing protocol bindings from profiles to binding documents as defaults, and making profiles and binding documents work together more nicely)
 - Web Thing Protocol Community Group (to try to provide consistency between Profiles and the WebSocket sub-protocol where relevant)
- Next Steps:
 - Restart WoT Profiles meetings from May
 - Quickly propose a resolution on either progressing WoT Profiles 1.0 to a Candidate Recommendation, or publishing it as a Working Group Note and moving on to Profiles 2.0
